from US carrier for up to 400 aircraft

European manufacturing consortium Airbus Industrie announced its biggest order - for up to 400 aircraft from USAir. Airbus said the US carrier had placed 120 firm orders for A319, A320 and A321 aircraft. These have a total list price of about \$5.3bn, although USAir is likely to have obtained substantial discounts. USAir placed an order for an additional 120 aircraft on a reconfirmable basis and arranged options on a further

Brittan seeks to end Cuba row

European Union trade commissioner Sir Leon Brittan (left) will today urge the EU and US to ettle their dispute over trade with Cuba. He will stress that the EU opposes to the Helms-Surton act, which authorises private US court cases against foreign companies "traf-

ficking" in confiscated Cuban assets, but will also endorse proposals for international co-operation to speed political reforms on the island. Page 10

Airbus wins order | Hint of Republican appointment in effort to foster bipartisan spirit

Clinton left with rebuilding task as three quit cabinet

of resignations, including those of three senior cabinet members, left President Bill Clinton yesterday with the task of putting together a new administration team after his convincing reelection victory.

Mr Warren Christopher, the

secretary of state, Mr William Perry, the defence secretary, and Mr Mickey Kantor, the commerce secretary, announced their intentions to commerce : go but left open the timing of

Others included Mr Leon Panetta, the White House chief of staff, who confirmed that he wanted to return to his native California, and Ms Hazel O'Leary, the much-criticised nergy secretary.

Mr George Stephanopoulos, as close to Mr Clinton as any adviser, hinted that the president could well pick a promi-nent Republican for one of the positions in the interest of promoting a bipartisan spirit.

Republican leaders in Cons, satisfied that they had

with the president. They gained at least one Senate seat, with the outcome in Oregon waiting on absentee ballots, and lost only about 10 in the House, with two Texas districts subject to run-offs next month and a few others yet to

Mr Newt Gingrich, the Speaker of the House, and Mr Dick Armey, its majority leader, said they would work

closely with the Clinton administration, beginning with restoring financial solvency to the Medicare programme for the aged. "We're not that far apart," the normally combative Mr Armey said. The financial markets wel-

comed the return of a president from one party and a Congress run by the other. The Dow Jones Industrial Average was up over 60 points shortly after midday, while long-term retained control of both bond prices held steady to

en-month interest-rate low.

However, public dissatisfaction with the political process was reflected in the level of voter turnout. Informal estimates put it at just under 50 per cent, at least 5 points down on 1992 and close to this century's low of 1924.

In California, voter participation apparently dropped below 40 per cent - in spite of some hotly contested state ballot propositions. They included an initiative designed to make it easier for shareholders to file lawsuits against companies, which was rejected overwhelmingly - much to the relief of the computer industry. A ban on affirmative action, and a proposition legalising marijuana for medical use, passed easily.

There was some doubt whether Mr Clinton would achieve the 50 per cent of the popular vote he considered a mandate for a second term. With 98 per cent counted, he was fractionally below at 49.5 per cent, compared with about

and Japan' in quality of car parts

Germany

'trails UK

The quality of German-made car parts lags behind that of products made in Japan, the US and Britain, according to a study by McKinsey, the US

management consultants. The findings, based on more than three years of research and involving 167 car component suppliers around the world, say that only 26 per cent of German suppliers operate at "above average" quality levels. More than two-thirds of UK suppliers, 44 per cent of US suppliers and 85 per cent of Japanese suppliers won this

Top management in car components industry itself has . . . devoted intensely to quality, more so than that of any other country in Europe", says the report. The research is based on a

formula, devised by McKinsey, which assesses quality on the basis of conventional criteria such as the number of defective components and on what is termed a company's "process quality". This is defined as its perfor-

mance in solving customer problems in an intelligent and flexible manner, often using the skills of shop-floor work ers rather than senior execu-

The study, which originated in McKinsey's German office and has been circulated to US motor component manufactur ers, flies in the face of current thinking. It had been assumed that UK parts companies were still some way behind German quality levels.

According to McKinsey, the driving force behind the change in Britain has been the influence of the car plants set up by Japanese groups. They have made "upping quality levels...a matter of survival for British suppliers", says the report. German companies, in contrast, have lacked this stimulus. The report says their "catch-up effort will need to begin with a drastic reduction

Bankers and Brussels divided over Emu

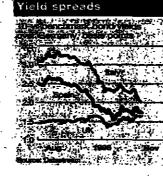

By Andrew Fisher in Frankfurt and Gillian Tett in London

European countries have been too slow in bringing down their budget deficits and debt levels ahead of monetary union, the European Monetary Institute, forerunner of the planned European central bank, said yesterday.

But in a move which highlighted the tensions between European politicians and central bankers about interpretation of the Emu convergence criteria, the European Com-mission yesterday issued its own, more optimistic report.

The EMI also indicated its disapproval of proposed policies by France and Italy to cut their budget deficits - but named neither country.

"A majority of member states do not fulfil the neces-

tion of a single currency," the

Milosevic leads retreat to communism

Serbian President Slobodan Milosevic, shunning his Socialist party, celebrated the results of Yugoslavia's elections in the headquarters of the communist party led by his wife Mrs Mirjana Markovic.

Sunday's elections for the federal assembly of Serb-led Yugoslavia, now solely composed of Serbia and its junior partner, the small republic of Montenegro, crowned the arrival at centre-stage of Mrs Markovic's Yugoslav Unified Left, or Jul, the Socialists' partner in a victorious leftwing coall-

They also heralded the demise of Serbia's ruling Socialists. Fearing for their political future, disgruntled Socialists privately complain of Serbia's return to communism and of the "undue influence of Mrs Markovic and Jul", as one put it.

A mixture of grey bureaucrats, wealthy managers of bankrupt state enterprises and war profiteers, Jul bombarded Yugoslavia's 7.5m voters with slickly packaged

Its slogan "Jul is cool" was aimed at younger voters. while its promises of a radiant economic future were aimed at those suffering nostalgia for Yugoslavia's late communist godfather Marshal Josip Broz Tito and the stability of the state he engineered after the second In Sunday's elections, the

coalition of communists and

The Serb president is discarding his nationalist colours in a calculated alliance with Marxist-Leninists, writes Laura Silber

Slobodan Milosevic and his wife on their way to vote at the weekend

seats reserved for Serbia in the lower chamber of Yugoslavia's federal assembly. The Socialists' sister party in Montenegro won 20 of the republic's 30 seats.

At the local and municipal level, however, the opposition four-party coalition known as Zajedno (Together) made significant gains. Observers put this split in voter loyalties down to the opposition's inability to compete against the left's monopoly control of the

vision of the country's future. The rise of Jul began in

1993 when Mr Milosevic abandoned his nationalist being seen as an effort to agenda to create a greater Serb state after the Serbs in Bosnia disregarded his recommendation that they accept a peace plan drafted by the United Nations and the European Union to end the republic's civil war. Last December, he completed his political metamor-

well as a failure by the oppo-sition to offer a coherent time of a man who began his time of a man who began his career as a colourless communist official, and sacked his closest collaborators in the Socialist party. This is remove any trace of his culpability for the wars in Croatla and Bosnia.

Jul. which was nurtured from infancy by Mrs Markovic, a professor of Marxism-Leninism, offered an alternative power base for personal band-picked by Mr Milosevic

A helicopter belonging to the Nato peace force yesterday chased a Bosnian government police car after it sped away from burning Serb-owned houses in a village abandoned a year ago by Serbs fleeing a Moslem-Croat offensive. In apparent retaliation for

the destruction last month of 96 damaged Moslem homes by Serb authorities, the incident was part of a campaign across Bosnia to prevent the return of 2m refugees, a provision enshrined in the Dayton peace agreement.

The houses were owned by Moslems who had applied to the UN High Commissioner for Refugees to visit their homes, now in Serb-held north-western Bosnia.

and who during the war had remained on the political

margins. The Socialists can read the writing on the wall. "Jul will take over everything," grumbled one bureaucrat, bracing been too ardent in their support for Serbian nationalism. Speaking on condition of anonymity, he said: "The nationalists are very dissatisfied". He pointed to the rel-

party of Mr Vojislav Seselj in both the federal and local The Radicals, which won

ultra-nationalist Radical

16 seats at the federal level, appear to have won the votes of people angry Mr Milosevic jettisoned Serbs in neighbouring Bosnia in 1993.

Mr Seselj, a former politi-cal prisoner who leads a paramilitary group, preaches national solidarity among Serbs - a catch-phrase for the eventual unification of all Serb lands.

The Serbian President rose to power in 1987 on a pledge to protect Serbs wherever they were in Yugoslavia. Many Serbs feel they gave away victory in Bosnia in the Dayton peace agreement.

They feel outraged and betrayed by Mr Milosevic, who strong-armed them into accepting the peace agreement a year ago and has now dusted off the communism whose slogans he seemed to have abandoned during his ascent. Some are now beginning to see him as an opportunist who had calculated that unbridled nationalism would maximise his grip over Serbia.

Mr Milosevic is believed to himself for future purges of want to become president or men tarnished with having prime minister of Yugoslavia next year when his term as Serbian president expires in December 1997. This would presage purges of the security services which maintain close ties with Mr Milosevic's former proxies among the Bosnian Serbs.

EUROPEAN NEWS DIGEST

Juppé under new attack

France's prime minister, Mr Alain Juppē, is not fit to have the job, Mr Charles Pasqua, a Gaullist former interior minister, said yesterday in an interview with Le Monde newspaper. He said Mr Juppé would make "an excellent chief aide to [President] Jacques Chirac" and he described the national executive of the RPR Gaullist party as "the first regiment of boot-lickers".

Mr Pasqua warned that France was on the verge of a revolt against the rigour of the government's policy to qualify for European monetary union. Next year, he said, we will see that the foot won't go into the shoe",

referring to plans to squeeze the budget deficit.

Mr Juppe cannot have felt his position reinforced. esterday when Mr Pasqua said, after having had lunch with President Chirac, that they had talked "about everything, very frankly". Mr Chirac has repeatedly stated his support for Mr Juppé, but French presidents

can change premiers at will. Mr Edouard Balladur, a Gaullist former prime minister, has added his voice to criticism of the government's handling of the sale of Thomson, the state-controlled electronics giant. He told the weekly newspaper VSD that ministers should have waited for the advice of the French privatisation commission before letting their preference for the Lagardère defence group's bid be known. But he said he agreed with the government's choice of bidder. David Buchan and David Owen, Paris

Finn calls for Emu delay

The new parliamentary leader of Finland's governing Social Democratic party has sharply criticised plans to launch European monetary union in 1999. This is in defiance of Mr Paavo Lipponen, the SDP prime minister who is pushing hard for Finnish membership of Emu. Mr Erkki Tuomioja said in a newspaper interview that

the Emu project was a risk for all EU countries and should be postponed for a decade. He was careful not to suggest he was planning any revolt against Mr Lipponen, whose pro-Emu policies won approval at the last party congress, but his stance is likely to prove awkward. It underlined the significant opposition to Emu.

In Sweden, meanwhile, Mr Erik Asbrink, the finance minister, told parliament the government there would not seek to enter Emu against the wishes of the public which is currently strongly hostile to the idea. "Making a decision which is in conflict with public opinion is out of Hugh Carnegy, Stockholm the question." he said.

MEPs face expenses squeeze

European MPs face a clampdown on their lavish expenses. Mr Klaus Hänsch, the assembly's president, who is committed to reforming an institution criticised even by insiders for extravagance, yesterday summoned leaders of the political groups to seek agreement on tightening the rules for benefits and travel allowances.

The meeting followed pressure from several MEPs after a British television documentary last month showed secretly filmed abuses of the system. These included members claiming allowances for the final day of

parliamentary sessions and then failing to take part.
The main political groups, including the dominant
Socialists, said yesterday they supported reform in principle but were waiting to hear the details of Mr Hänsch's plans which he will present today. If the president, vice presidents and political group leaders can agree on reforms they could be imposed without a Neil Buckley. Brussels parliamentary vote.

Hard Rock Cafe penalised

Police yesterday shut down the Hard Rock Cafe in Paris for two weeks, saying it had imported beef from Britain in defiance of a ban imposed because the "mad cow" scare. The restaurant, a favourite resort of Americans. describing the move as "totally unjustified", said it would appeal against the closure which was linked to the seizure by health inspectors last week of 300kg of frozen

A police statement said the agriculture ministry had confirmed that the import to France of the beef seized on October 28 was illegal". It cited a danger of "serious risks incinerated.

The Hard Rock Cafe, part of an American-style chain owned by the Rank Organisation, said the hamburgers came legally from cows raised in Ireland and had merely been processed in Britain.

Romanian coalition forming

Romania's two main opposition parties, which defeated the former Communists for the first time in Sunday's parliamentary elections, said last night they would sign a governing pact today. Results announced yesterday gave the centre-right Democratic Convention 30 per cent, and the Social Democratic Union, the second pro-reform opposition group, 13 per cent. However, the two groups will hold about half the seats in parliament once the votes of parties not reaching the 3 per cent threshold are redistributed. The ethnic Hungarians' party, which won ?

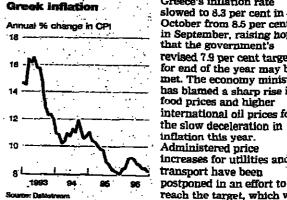

per cent, also announced it expected to support them. However, a new administration cannot be formed until after a run-off for the presidency on November 17. President Ion Iliescu polled better than his Party of Social Democracy, the former Communists, gaining 32 per cent compared to the party's 22, but faces an uphill battle to beat the Convention's Mr Emil Constantinescu who won 28 per cent. Mr Roman, who came third with 20,5 per cent, is due to endorse Mr Constantinescu today.

Mr Iliescu relaunched his campaign yesterday, saying he would co-operate with an opposition government but that the Convention was inexperienced and over-optimistic and that he was the only guarantor of

stability and social peace. International observers declared the elections fair although they noted a high 5 per cent of ballot sheets Virginia Marsh, Buchares were void.

ECONOMIC WATCH

Greek inflation rate eases

October from 8.5 per cent in September, raising hopes that the government's revised 7.9 per cent target for end of the year may be met. The economy ministry has blamed a sharp rise in food prices and higher international oil prices for the slow deceleration in inflation this year. Administered price increases for utilities and transport have been postponed in an effort to reach the target, which was

Greece's inflation rate

initially set at 5 per cent. However, private sector analysts said substantial real wage increases this year, amounting to around 11 per cent in the public sector, had kept inflation high. Greece is aiming to reduce inflation to 4.5 per cent by December next year under its convergence plan for participating in European monetary union by 2001. Kerin Hope, Athens ■ Finland's current account surplus was FM2.3bn (\$506m) in September compared with FM2.6bn a year earlier.

Yeltsin takes back reins of power

By Chrystia Freeland in Moscow

Less than 24 hours after going under the surgeon's knife, Russian President Borls Yeltsin yesterday resumed full control over his country and began what officials described as a "surprisingly" good recovery from his quintuple heart bypass operation.

At 6am yesterday he signed a decree ending the temporary stewardship of Mr Victor Chernomyrdin, the prime minister, who had been entrusted with full presidential powers when the Kremlin leader's heart surgery began on Tuesday

Mr Yeltsin, who met Mr Chernomyrdin for 15 minutes and was allowed brief visits from his family, was taken off a ventilator, an

Russia's nervous political establishment, whose grip on power had been threatened by Mr Yeltsin's prolonged illness, appeared relieved by the president's early signs of vigour. Government politicians and business leaders hope the successful operation will end the uncertainty which has plagued Russia since the president disappeared from active

politics in late June. But with even the most upbeat forecasters predicting it will be three to four months before the president can resume a full workload, the Kremlin is likely to lack a

clear leader for some time. "The president is on duty again," Mr Chernomyrdin said after his brief audience with Mr Yeltsin. "I

hope everything will be fine." The Kremlin's official spokesman news briefing that the president's leader who was defeated by Mr Yeltphysical rebound had exceeded doc- sin in the July battle for the presitors' expectations.

"All of us in the Kremlin are in a good mood because Boris Nikolaevich is recovering quickly, surprising the doctors with his strong health and powerful will," he said. But Mr Chernomyrdin - himself a

survivor of a heart bypass performed by the Russian doctor who operated on the president - tempered the elation with his insistence that a gentle and gradual convalescence was essential.

The premier, who many observers elieve is being groomed to succeed Mr Yeltsin, said he and his government would seek to keep the burdens of state from weighing too heavily on the president.

That verdict was echoed by Mr

'He must now care more about his health." Mr Zyuganov said. "He must trust more of the people he is working with, otherwise there will be neither [Mr Yeltsin's] health nor an effective government.

Russian markets reacted with cautious enthusiasm to the news with a rise of just under I per cent in share prices and a gentle fall in yields on domestic bonds. Some dealers predicted a further rally next week, when Russia goes back to work after the three-day Bolshevik Revolution holiday which begins today. But the financial community's

response could be muted by continued concerns over the economy, which faces a severe cash shortage

was even more cheerful, telling a Gennady Zyuganov, the Communist and desperately low tax revenues.

Bonn sets deadline on spending cuts

By Peter Norman in Bonn

The parties in Chancellor Helmut Kohl's coalition government have set a deadline of next Monday to achieve DM3bn (\$2bn) in savings and so ensure that the 1997 federal budget deficit does not exceed the planned

The scale of the necessary spending cuts emerged after talks late on Tuesday among leaders of the three governing parties under the chairmanship of Mr Kohl and after a meeting of the Bonn cabinet vesterday.

The government is determined to keep to next year's planned net borrowing requirement without raising taxes as part of its efforts to meet the Maastricht criteria for the start of European economic and monetary union in 1999.

The discussions on Tuesday also resulted in a truce between the small Free Democrat party and its Christian Democrat and Christian Social coalition partners over how far to cut the hated solidarity surcharge, which is added to income and corporation tax bills to help

Brussels widens Bremer Vulkan probe relating to the aid payments.

The European Commission is to extend its investigations into the misuse of state ald at Bremer Vulkan, Germany's largest shipbuilding group, writes Emma Tucker in Brussels. It said yesterday a further DM200m (\$132m) of aid, on top of DM588m stready identified, had been diverted from the group's ailing east German yards, for which it was intended, to the mother company in west Germany.

Brussels believes the money, intended to modernise the east German yards, was placed in the group's central budget and used to cover losses in other parts of the group. "The money should have been available for the restructuring and operation of the two eastern shipyards which were placed in an extremely difficult position as a result of the withdrawal of funds by their parent company."

Mr Friedrich Hennemann, Bremer Vulkan's former chairman, was arrested last summer because of irregularities

of investigations carried out by an auditing company appointed in Germany, the total amount of money diverted amounted to DM788m. This sum was made up of DM492 of restructuring aid from the Treuhand privatisation agency; a DM112 loan granted to one of the east German shipyards without the Commission's permission; DM44m in regional aid; and DM139m in interest accruing on aid already paid. Brussels yesterday approved the use of German state aid to help ship operating companies cover the difference between the cost of manning German-flagged ships and those operating under flags of convenience. Mr Karel Van Miert, competition commissioner, is expected to block a Spanish cable television deal between Spanish telecommunications group Telefónica and French pay-TV company Canal Plus.

threat to impose pay deal By Neil Buckley in Brussels Mr Jean-Luc Dehaene, Belglan prime minister, yes-

terday warned unions and employers that the government would impose a 1997 wage deal if they failed to reach an acceptable agreement by the end of Novem-After the acrimonious collapse late on Tuesday of

talks between Belgium's unions and employers' organisations, Mr Dehaene said in an interview the gov-ernment recognised it might be forced to use powers provided by a law passed in July to impose a wage settlement for the country's 2.2m private sector workers. "I very much hope we

won't have to do so, but I He acknowledged that such intervention by a government already deeply unpopular following a series of legal scandals could provoke industrial unrest.

The government plans to give unions and employers a "cooling-off" period before attempting to mediate. If there is no agreement by the end of November, the government can impose one. The law authorised unions

and employers' organisations to agree the first pay rise for Belgian workers in three years, provided the increase did not exceed the average in Belgium's biggest trading partners - Germany, France and the Netherlands. Belgian citizens have endured the pay freeze as part of an austerity programme to ensure Belgium

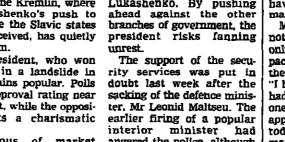

qualifies for Emu. Talks on a deal for all private sector employees about two-thirds of the workforce - began last month but broke down over pay levels and union demands for job creation measures, prompting the socialist FGTB union, Belgium's second biggest, to call a one-day strike last week.

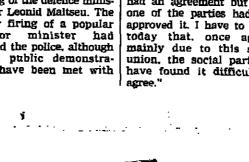

Talks restarted after both sides met Mr Dehaene on Monday but collapsed almost immediately. The Belgian employers'

federation yesterday blamed the FGTB for the failure, accusing it of "introducing unacceptable elements' when it published a list of demands this week. The FGTB said the federa-

tion's complaint was "paradoxical" since it had attacked the union for not having a clear negotiating mandate. Mr Dehaene yesterday

noted that the FGTB was the only union not to back a jobs pact he sponsored between the social partners in spring. "I had to state in May that I had an agreement but that one of the parties had not approved it. I have to state today that, once again, mainly due to this same union, the social partners have found it difficult to

NEWS: EUROPE

Reports give differing verdicts on the progress made by countries towards Emu

sees bad omens for smooth start

expecting harshly critical words from the European Monetary Institute will be disappointed by its latest report - Progress Towards Convergence 1996. But its message is a strong one, though wrapped in restrained rather than barbed language.

Charged with assessing how briskly European Union members are proceeding towards European economic and monetary union, due to start in 1999, the EMI has made clear it is not too

Overall, the report concludes that at present a majority of member states do not fulfil the necessary conditions for the adoption of a single currency," the institute notes. It is concerned that action to bring down budget deficits has generally been too slow, although projections for 1996 suggest there has been prog-

for Fundely

· Million va

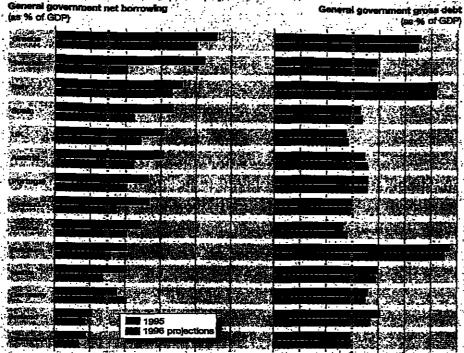

二、主流 沃田灣

As the forerunner of the planned European central bank, the Frankfurt-based EMI is keen to see not only that the convergence criteria laid down in the Maastricht treaty are met but that they can be sustained.

Financial markets are starting to look beyond 1999 and take a view on future price, fiscal and other trends. They will assess how competitive, attractive and open the euro area will be in global terms.

All these factors are being fed into long-term interest and exchange rates - "and they will ultimately determine the long-term interest rate and exchange rate levels of the euro", the EMI problems".

How countries measure up to Maastricht

notes. So it is not enough just to meet the criteria. Nor do countries' budgetary and debt problems arise just from striving to qualify for Emu; high unemployment and the pension challenges of an ageing population also

need to be tackled. Thus, the institute says sternly, governments are "well advised not only to focus on the achievement of convergence in a single year. but also to demonstrate the political will and the ability to tackle the underlying

So far, it asserts, they are generally failing to do this effectively enough.

While inflation is kept down, exchange rates are fairly stable and interest rates not too high, "progress in fiscal consolidation has generally been too slow". Most countries have not yet reached a situation which could be called sustainable in the medium term.

Without mentioning France Télécom or the window-dressing budget measures planned by Italy, the clear on this. "It is empha sised that the improvement of the deficit by measures with a one-off effect does not ensure sustainable consolidation, and great attention will have to be paid to the substance and not only to the accounting methods used in measuring both defi-

cits and debts." This will be music to the ears of the Bundesbank, which dislikes the manoeuvring by the French government to use pension fund transfers from the state telecommunications company to

lower its 1997 budget deficit. The German central bank, decades bolstering the preted is a political one. strength of the D-Mark, is concerned that Emu should not start under circumstances which undermine stability and confidence.

The EMI also takes a swipe at Italy, though also without mentioning it by name. The higher a country's accumulated debt, the "more resolute" its consolidation efforts need to be. It is estimated that Italy's public indebtedness will be at 123 per cent of gross domestic product at the end of this vear against the Emu crite-

ria level of 60 per cent. Still higher is Belgium's although this has been coming down for three years. Italy has made only marginal progress since 1994. Starting from a lower level, Germany, Spain and Austria have been on a continually rising debt path up to 1995, while the Netherlands, Portugal, Finland and Sweden have experienced mixed results in containing debt

On the budget side, performance is equally mixed. Earlier improvements have been reversed in Germany, and Austria's deficit is coming down after rising in recent

Most other countries have managed to bring budget deficits down since 1998, but these are still expected to remain considerably above the criteria level (3 per cent of GDP) in Spain, France, Portugal, Sweden and the UK and well above it in Greece and Italy.

Ultimately, the decision on

who joins Emu, whether it will start on time and how which has spent four strictly the criteria are inter-

But the EMI, representing the EU's central banks, is charged with reporting on countries' relative progress: yesterday's report was a test run for its final recommen dations early in 1998 based on 1997 data

Based on the institute's verdict, the omens for a smooth start to Emu do not look too favourable at this

our countries - Denmark, Ireland, the Netherlands and Luxembourg - look likely to meet the 3 per cent budget limit this year, while three -France, Luxembourg and the UK - will probably fall within the 60 per cent debt

Thus tiny Luxembourg remains the only sure candidate. However, Germany has stated its determination to slide back under the budget threshold (its deficit is put at 4 per cent for this year) and hold down its overall debt, which is barely above the Maastricht line.

France (at 4 per cent and 56.4 per cent respectively for 1996) is also pushing hard, as its France Télécom ploy

As for Italy, the EMI calls "very strong and sustained action". When Emu decision time comes, defining "sustained" and "sustainable" will be a

matter of hard politics rather than semantics Editorial Comment, Page 15

Spanish and Italian bonds show surge

By Richard Lapper, Capital Markets Editor

and Spanish Italian government bonds surged again yesterday morning on hopes that both countries could become founder memunion, with yields on Italian 10-year paper falling to the same level as those on UK gilts at one point,

Later in the day these markets lost ground in comparison with gilts but still outperformed the German market, which acts as a benchmark for European markets.

"There is complete euphoria," said Mr Mark Fox, chief European strategist at Lebman Brothers, the US investment bank. "No one has any interest in negative stories on convergence.

As recently as January, Italian 10-year bonds were paying a yield of nearly 3 percentage points more than gilts, but this gap - or yield spread - has narrowed sharply, especially over the

last two months. By late afternoon, Italian yields were about a tenth of a percentage point higher than gilts, while Spanish yields were more than a fifth of a percentage point lower.

Investors have been encouraged by the prospect that. following announcement of their 1997 budgets in September, both Italy and Spain could reduce their fiscal deficits to the 3 the Maastricht treaty, which could allow them to become founder members of Emu.

This week sentiment has been buoved by comments from Mr Jacques Chirac, the French president, indicating his belief that Spain would make the first stage of Emu. The US election result, which initially buoyed the dollar and US treasury markets, has also helped. The value of the peseta and the lira against the D-Mark typically rises or falls in line

with the dollar. Yesterday's report by the **European Monetary Institute** less upbeat than one from the European Commission was initially ignored by trad-

Brussels gives upbeat budget deficit forecast

The European Commission yesterday delivered a resounding declaration of support for the single currency project by forecasting that most countries would fulfil the budget deficit.

Its latest half yearly forecast and report on economic convergence projects that 12 out of the 15 European cent of gross domestic product or below in 1997 - the crucial ratio needed to join Emu in 1999.

The only laggards are forecast to be Greece, the UK

and Italy. However, in a move that raises hopes of an early Emu membership among Mediterranean countries, even Italy is deemed close to the target: the Commission admitted that it was examining some Italian budget measures which could cut the country's deficit to 3 per cent, too, if approved by the statis-

The Commission's 1997 deficit projections largely match the declared budget targets of the EU governments. However, they are deemed by most economists

least because the Commis- make Emu happen. sion also issued fairly modest growth forecasts for the

The Commission expects European Union growth to rise to 2.3 per cent next year, from 1.6 per cent this year. This is similar to its last projections six months ago, albeit with German growth sharply revised up, and Italian growth revised down.

Report seen as political will behind Emu

But it remains unclear whether these growth rates will be enough to cut deficits as fast as projected - particularly in Italy, which is expected almost to halve its deficit, and Spain which is expected to cut it from 4.4 per cent this year to 3 per cent next.

Consequently, economists yesterday interpreted the report as a clear signal of the strong political will behind Emu - irrespective of economic obstacles

investment bank Kleinwort Benson said: "It shows that Italy are projected to have the Commission is deter-debt to GDP ratios almost the Commission is determined as much as anyone to twice the target level in 1997.

But though the Commission took an optimistic line about budget deficits, it also admitted that progress over the other Emu criteria was patchy.

Indeed, the only country that met all the criteria last year was Luxembourg, it

Countries such as the UK Italy and Spain, for example, are still struggling to meet the inflation target (which requires inflation rates to be points above the average of the lowest three countries.)

On the debt side, the Commission points out that there has been a "steady reduction" in the debt ratio in recent years in Belgium, Denmark and Ireland.

It forecasts similar falls in Greece, Italy, the Netherlands, Portugal and

Howver, in 1996 only Luxembourg, the UK, and France had debt to GDP ratios below 60 per cent the single currency target. And the Commission admits that Germany's and Finland's debt is projected to conomic obstacles. rise above 60 per cent of Mr Julian Callow of GDP in 1997.

TOUGH TIMES AHEAD FOR VIPs be merged, scaled down or wound up.

Pakistan's two-day-old interim government yesterday aimed for a highly populist debut by immediately dismantling aspects of the "VIP culture" which cossets the country's governing elite, slashing ministerial salaries by half and announcing an end to a host of other privileges, write Mark

Nicholson and Farhan Bokhari. The nine-member cabinet, which has been formally granted a three-month tenure, characterised the move as part of an ambitiously crash programme akin to "remaking government". It said it would seek to cut the size of government and restructure it. The new ministers have been given the unlikely deadline of a week to find ways of cutting the bureaucracy "to suit a developing country such as Pakistan"

Mr Irshad Ahmed Haqqani, interim information minister, said the cabinet had also been given three weeks to examine Leghari of having "propa-gated" a financial crisis to ministry and recommend ways they could semi-autonomous corporations under each

Mr Haqqani said the cabinet had also decided to ban all overseas medical treatment for bureaucrats and elected officials, limit ministers to the use of one official car only, ban first class travel for overseas visits and make ministers fly

economy on domestic trips.

Saying the cabinet had "noted that the use of VIP lounges at airports has become an anachronism in an Islamic and democratic order", Mr Haqqani said all such lounges at Pakistani airports would be abolished and turned over for civil use. He said that "henceforth there will no government involvement in declaring anyone a VIP".

Though modest in substance, such moves are intended to set a crowd-pleasing 'example of good government" following the dissolution of the Bhutto government, under which it said "mismanagement inefficiency, nepotism and corruption had

China hopes Clinton's win will boost ties Hardliner takes

ASIA-PACIFIC NEWS DIGEST

Cabinet changed in Vietnam

The Vietnamese cabinet was reshuffled yesterday with new appointments announced for the finance, foreign investment and trade portfolios. The shake-up is not likely to portend any great shifts in policy, given the highly consensus-oriented nature of decision-making in Vietnam and the fact many of the ministers are stepping up from the number two position in their organisations. The finance minister will be Mr Nguyen Sinh Hung, until now deputy finance minister. The minister of planning and investment will be Mr Tran Xuan Gia. promoted from number two in the department.

One economic related surprise is that Trade Minister Le Van Triet will retain his post. It had been expected he would step down. Mr Le Minh Huong will head the powerful interior ministry - again a promotion from being a deputy minister.

Australia losing Asian market Underlying lack of competitiveness has caused Australia to fall behind other centres in winning a share of the

Asia-Pacific region's growing financial services business, a government-commissioned report claimed yesterday.

The report, commissioned by the Department of Industry and overseen by Mr Vince Fitzgerald at the Allen Consulting Group, says Australia has lost significant share to Hong Kong and Singapore over 15 years.

A survey of financial services suppliers found only 61 per cent gave Australia strong endorsement as a financial centre, against 84 per cent for Hong Kong and 81 per cent for Singapore. The report notes that Australia "over-uses financial transaction taxes"; that its foreign investment funds tax regime raises barriers to entry into its fund management industry, and that it has only belatedly adopted an offshore banking unit regime, still complex and uncompetitive with Singapore's. Nikki Tait, Sydney

Death for Chinese bank chiefs

Two senior Bank of China managers were sentenced to death by a court in China's southern Guangdong province yesterday for misappropriating Yn710m (\$86m), court officers said. Feng Weiquan and Chi Weiqi, section chief and deputy section chief of the bank's branch in the city of Zhongshan, were given the death penalty by the city's Intermediate People's Court, with Chi's sentence suspended for two years. The prosecution said the defendants had misused a reserve fund of the bank's Great Wall credit card. Reuter, Macai

Opposition leader demands a re-think of investment policy

Thai compulsory savings urged

ean policy.

Ry Ted Bardacke in Ubon Ratchathani

General Yongchaiyudh, a favourite to become Thailand's next prime minister, says a nationwide compulsory retirement savings scheme and curtailing investment would be the cornerstones of his attempt to solve the country's chronic current account deficit and restore international confidence in the Thai economy.

A national savings plan would collect Bt600bn (\$23.5bn) in the first year alone and raise the national savings rate to 40 per cent of gross domestic product, he said, thus limiting the country's seemingly insatiable appetite for foreign capital.

At that rate, Thailand would still have a savingsinvestment gap. Gen Chavalit, leader of the New Asptration party, said this could be minimised by rethinking the country's investment push, which has been the main force behind record economic growth but has been fraught with difficulties in some sectors.
"We have to stop putting

up projects of very low or no economic return," Gen Chavalit said in an interview aboard his campaign bus along the back roads of north-eastern Thailand. "We've always been thinking we're going to be the next Asian economic tiger but we're still a long way from that. We have to come back

This idea contrasts He admitted that reserving economic ideas put forward by the Democrat party, the other main contender in the November 17 election, which has said better liquidity and lower interest rates can immediately revive the econ-

Gen Chavalit said every available short-term measure to boost Thailand's sagging export growth would be considered by a team of qualified experts, led by Mr Amnuay Viravan, a former banker and former deputy prime minister.

The experts, who would not necessarily include MPs, would be appointed to the ministries of finance, commerce, industry, transport and foreign affairs, he added.

sharply with some of the such ministries - among the most lucrative for politicians trying to reap benefits from ministerial posts - for non-politicians might make it hard for him to form a coalition and keep it together.

Political parties that wanted to join a New Aspiration-led coalition would have to pledge to support the party's policy goals. New Aspiration would take charge of the economy, while the responsibilities of other parties would be divided up by issue, such as social, education and labour.

"Forming a coalition by simply counting up numbers won't happen any more. We are really concentrating on this point," he said.

Sri Lanka to legalise gambling

By Amal Jayasinghe

Sri Lanka yesterday announced plans to legalise gambling, including casinos, as part of new revenueraising measures in 1997's budget to meet rising defence spending and a worsening budget deficit.

Unveiling his proposals for raising revenues for next year's budget, Mr G.L. Peiris. deputy finance minister, told parliament the gambling parlours would be open only to foreign nationals and supervised by the Ceylon Tourist Board.

"I am a Jew. A believing one." said Mr Kopatch who appeared before the education committee of the Knesset which met yesterday to discuss the issue. "The Torah is a great and important thing in my eyes. This programme tries to bridge the terrible gap between the secular and religious."

Mr Shmuel Halpert, a parliamentary deputy and member of United Torah Judaism, disagreed. He told the IBA "to make some order. If someone offended Mohammed or Jesus, everybody would be angered. Of course there is free speech and democracy but democracy is also

The IBA has been swamped with faxes of support from secular to open next month. "It is Israelis after they heard the ultra-Orthodox rabbis wanted to muzzle Mr Kopatch. But the rabbis have backing from Mr Avigdor Leiberman, director of Mr Netanyahu's office.

Mr Leiberman suggested earlier this week that Mr Kopatch had committed a crime. Ms Dalia Itzik. a member of the opposition labour party, accused Mr Leiberman of "placing himself as the chief censor on the freedom of expression in Israel."

Mr Lidar said the prime minister had the final say. "I don't are still waiting for is action know what he will do."

Developing unique programs of innovative cash management solutions.

THE CHALLENGE. A leading American IT-company had enjoyed a rapid expansion throughout the European region. But its financial structure had not kept pace. Each country had its own banking relations and there was no central treasury function in the region. With ABN AMRO Bank, the company created a twolevel Resident Pass Through account structure. This allowed the company to eliminate the usual high costs of moving funds cross-border or between resident and non-resident accounts in many countries. The structure significantly reduced their costs while protecting their customer relationships. ABN AMRO Bank automatically sweeps funds daily into the master non-resident account, assuring appropriate interest is earned on balances, thereby eliminating idle positions. The company was also able to collect its US dollar receipts through accounts of each local representative held in a cash pool at ABN AMRO Bank London.

Our Cash Management Network at work for you.

THE SUPPORT. Such an attractive solution is typical of the creativity of the International Cash Management experts at ABN AMRO Bank. As a top provider of ICM services, ABN AMRO Bank's staff of seasoned cash management professionals have the expertise to combine multiple international disciplines in order to deliver the right solutions for our customers. The result? The ideal structure coupled with state of the art electronic systems, plus the highest quality customer service available. This rare combination is the reason why so many international companies have established a partnership with ABN AMRO Bank. A combination that not only gives clients access to a vast network of knowledge to assist them with the complexity of managing their cash around the globe, but also offers instant local access to an unparalleled range of facilities at more than 1600 branches throughout the world.

> ised campaign finance reform. They have been promising it for years, but have never been able to give up the advantages of incumbency in attracting big money. Next year when Republicans investigate foreign contributions collected by the Democratic National Committee, as they have vowed to do, it may be more difficult to avoid reform.

The National Rifle Association was successful in getting many pro-gun House candidates returned, but support for gun control also

helped in some races. The absence of clear ideological trends was most noticeable in governorship races. Democrats won seven of the 11 races, including three of four open seats.

Nancy Dunne

New kids on the White House block

ockeying for position in the new Clinton cabinet has already begun as leading actors prepare to leave centre US political

In addition to departures from the departments of state, defence and trade, one of Mr Clinton's closest confidants. Mr George Stephanopoulos, is expected to leave the White House in the New Year. A Clinton eminence grise for the last half decade he confessed to feeling "burned out" after five hectic years.

Mr Leon Panetta, the president's chief of staff, budget negotiator and disciplined political professional, is thought to be hankering for his native California. He could run for state governor in 1998, for which he would need time to prepare.

He could be succeeded by Mr Harold Ickes, now his deputy, or Mr Erskine Bowles, also once a Panetta subordinate and now involved in investment banking back in North Carolina. Mr Jack Quinn, the president's legal counsel and formerly vice-president Al Gore's right hand, is another name to watch.

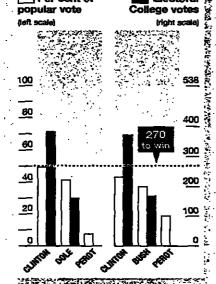

The future of Mr Tony Lake, the national security adviser, is shrouded in mystery. If he goes, possible replacements include Mr Strobe Talbott, now deputy secretary of state but not a realistic contender for the top job. Mr Sandy Berger, currently NSC number two. and, less likely, Mr Richard Holbrooke, chief architect of the Bosnian peace accords.

The economics team may change less than most. Mr Robert Rubin is unassailable as treasury secretary and loves his job, as does Mr Robert Reich, labour secretary, although he could switch portfolios.

The security of Mr Rubin's tenure may be a source of frustration for Mr Larry Summers, his aggressive number two, and Ms Laura defence secretary, will also D'Andrea Tyson, running go too. California voters opt to bring end to than his opponent. Both parties have prom. Sed campaign quotas

Rebuke for List on share freeze

By Gerard Baker

The state of California may no longer be able to hire employees, award contracts to companies or grant admission to its colleges and universities on the basis of racial preferences.

But the state's residents could be permitted to use marijuana for medicinal purposes as a result of state referendums on Tuesday. The decisions, however, may be subject to legal chal-

California's voters backed by a big majority proposition 209, a call to end the policy of affirmative action through racial quotas. They also supported proposition 215, which approves the use of marijuana for those suffering from diseases such as Aids and cancer.

By an even bigger margin. they rejected proposition 211, which would have made it easier for investors to sue individuals for making false statements about a business or failing to disclose information affecting a company's shares. Companies are estimated to have poured over \$35m into the campaign to beat 211, an investment that paid off.

California's initiatives have in the past often been the trigger for subsequent nationwide policy shifts, but there was little evidence from Tuesday's votes of a consistent trend in popular preferences across the comtry. Different states took radically different stands on issues ranging from environmental protection and gambling to increases in the minimum wage and taxes.

One issue that got widespread support, however, and one likely to be a national topic in the next year or so was campaign finance reform. Arkansas. Colorado and Nevada passed limits on campaign contributions and the voters of Maine, in addition to back ing a proposal to tighten but could be amenable to a such limits, also approved taxpayer funding for candidates who refuse special interest contributions altogether.

Voters in Florida, Idaho, competing private sector Maine and Montana and that would have stiffened environmental protection laws. But the people of New York supported a \$1.75bn bond issue for various prolects including the cleaning of Long Island Sound.

Several states banned the hunting of wild animals. though voters in Alabama backed an amendment to their constitution making hunting a protected right.

Gambling was extended in Louisiana and Arizona, but restricted in Arkansas and Colorado. In California and Oregon.

proposals to raise the minimum wage were approved, while in three other states similar measures were rejected. Idaho and Nebraska rejected proposed limits on property taxes, but the voters of Florida amended their constitution to require the approval of a two-thirds majority in a statewide referendum before new taxes can be levied.

Deep-rooted economic fears loom over second term

dling the administration's Senator Sam Nunn of Geor-

The swing in the public's mood on the economy was one of the remarkable stories of this election year, argues Gerard Baker

In the end, it was a hopelessly Mr Bill Clinton's superior rhetorical skills, his obvious charm and youthful vigour, nor even the appeal of his ideas that made it so. The key to the election, as it had been in 1992, was how voters saw the economy.

Mr Clinton was the beneficiary and, he would argue, the begetter - of a confluence of favourable economic conditions almost unique in the past three decades of presidential contests. In the four years of his first term, the US economy has expanded in all but one quarter: unemployment dropped to a 30-year low inflation was at its lowest for a decade.

"Are you better off today than you were four years ago?" was Mr Clinton's repeated campaign question to voters. consciously echoing Mr Ronald Reagan's case for re-election in 1984. The answer was a clear Yes.

According to exit polls taken on Tuesday, 33 per cent of voters thought they were indeed better off than they had been in 1992; only 20 per cent said

they were worse off. Some 56 per cent felt the economy was in excellent or

likely to stay in office until Perry's number two, was

good condition. The picture of a country serenely enjoying economic prosperity at home and peace abroad is usually an irresist-ible invitation to back the incumbent, and 1996 has been no exception.

And yet the remarkable story of this election year is that, just a few months

In pursuit of profits, big US corporations were ritually culling jobs

ago, the voters' mood was markedly

Last winter and in spring the country seemed gripped by a vicious outbreak of economic insecurity. In pursuit of greater profits, big US

corporations were engaged in a ritual

culling of jobs, dubbed the "downsizing

Increasingly competitive international markets were forcing down wages as huge redundancies heightened fears about the future. Consumer confidence fell to a two-

year low in January and a clear majority of Americans believed the country was on the wrong track.

The anxiety alarmed politicians, In the Republican primaries in February and March, Mr Pat Buchanan's "peasants with pitchforks" threatened to overrun the establishment with their message of "America First" economic populism. The president himself talked nervously of an outbreak of "funk".

What happened to transform the popular mood in not much more than six months?

Part of the answer is probably that the angst was overdone. Consumer confidence, though it dipped at the start of 1996, remained well above levels usually seen in recessions, and most people never even came close to being ety about America's economic prosvictims of downstring.

But there has also been a marked improvement in economic conditions

The recovery that began before Mr Clinton took office slowed sharply last year as higher interest rates in 1994 began to bite. But the Federal Reserve's easing of policy at the start of the year has helped the economy pick up speed again in

Last year growth was a flat 2 per cent; in the second quarter of this year it accelerated to 4.8 per cent. The unemployment rate has fallen from 5.8 per cent in January to 5.2 per cent last

The electoral timing of the current upswing could not have been better for the president. If the election had been held a year ago, the result would probably have been different.

Yet the critical point for the second Clinton term is that there is little sign last year's improvement has done much to assuage the longer-term anxi-

debate throughout the 1990s.

In 1992 and 1994 "voter rage" threw out incumbent presidents, senators and congressmen. A large part of the dissatisfaction was attributed to the long-term under-performance of the US economy. Real disposable incomes have been largely stagnant for nearly two decades; productivity growth has been lacklustre.

Federal Reserve's easing of policy has helped the economy pick up speed again

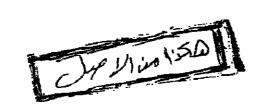

For all the successes of the past four Clinton term, the expansion was unspectacular compared with long-term rates of growth. The same exit polls that demonstrated short-term pects, an issue which has dominated optimism on Tuesday also revealed

deep fears about the longer-term

Slightly more than a third of voters believe their children's real income will ultimately be lower than their own, one third think it will remain the same and just 30 per cent of voters believe their offspring will enjoy a higher standard of living

And to that unusually pessimistic view will be added in the next few years growing concern about looming pressures on the US economy as a whole. These include the inevitable fiscal crunch from the rising cost of entitlements; a deteriorating education system that threatens to depress productivity further: and the real risks of urban disintegration from the plagues of drugs and crime.

Mr Clinton has been unusually fortunate. The economic cycle has worked years, even in the recession-free first in his favour in two elections, enabling him to oust an incumbent in one and to cruise to re-election in the second. It is probably his further good fortune that he will not get the chance to prove himself a third time.

NEWS: THE AMERICAS

Rebuke for US on share freeze

By Kenneth Gooding. Mining Correspondent

An Ontario court has released US\$152m worth of shares owned by Mr Robert Friedland, the international mining entrepreneur, that were impounded in August at the request of US authori-

The court criticised the US authorities for failing to disclose all relevant, material facts and ordered the US to pay Mr Friedland's costs. The US authorities must decide by late tomorrow whether to appeal.

At previous hearings the US authorities said the shares would cover the cost of cleaning up the Summitville gold mine in Colorado owned by Gallactic Resources, a company which Mr Friedland launched in Vancouver and where initially he was both chairman and chief executive. Summitville closed in 1991 and Gallactic was declared bankrupt shortly afterwards.

It is believed this was the first time the US authorities froze assets abroad to cover environmental clean-up

The shares represented a third of those Mr Friedland received from the C\$4.3bn (US\$3.2bn) takeover of another of his companies, Diamond Fields Resources, by Inco, the world's biggest nickel producer.

The Ontario court also ruled that the US had failed to make out a case to show Mr Friedland was liable under US environmental law for the costs of remedial

work at Summitville. Mr Friedland filed an affidavit in September which said his interests were severely damaged by the freeze on the shares, which he needed as security to finance business opportunities. He said from his Singapore office yesterday that he would study the full text of the judgment before deciding on any further action.

be won by the year 2000

ders' position - that they want nothing to do with entrenched. Economic wealth from fishing, which has increased per capita income seven-fold since the war, has bolstered the tiny

negotiating power. For both Britain and the Falklands, the sovereignty issue is trilateral, with the islands' elected council having ultimate say. Buenos self-determination for what ing Argentines to visit the it regards as stolen territory, regarding resolution of the dispute as a purely bilateral Argentine offer to clear landaffair to be hammered out mines left over from the war with London.

"Anglo-Argentine relations are, to some extent, being held hostage to the wishes of 2,000 islanders," says Mr Victor Bulmer-Thomas, director American Studies. "At some point, there is bound to be ome kind of reaction in Buenos Aires."

Argentina, which as part of its "charm offensive" on sland sentiment has yielded on several issues, may be running out of patience, Mr Bulmer-Thomas says. Buenos Aires has made several gestures, such as allowing flights between Chile and the islands to pass over Argentine territory, but has so far seen little in

Argentine frustration has come evident in its refusal to sign a long-term fishing agreement to protect fish stocks that straddle Falkland and mainland waters. Catches of ilex squid, on which the Falklands' economy is heavily dependent, have fallen dramatically in recent years and Argentina may be tempted to use the threat of continued over-fishing as a last-ditch - and potentially devastating -

bargaining chip. To prevent such action, Mr Bulmer-Thomas believes Falklanders need to make some appeasing gestures. These might include allow-

islands, re-establishing airlinks, and acceptance of an Among more moderate

sections of Falklands opinion, there is a belief in greater flexibility. Mr Terry Betts, an island businessman and one of three Falklands of the Institute of Latin representatives at the ABC conference, says Falklanders should be "reconciliatory, by allowing Argentines to visit the islands".

Mr Betts, who is an advocate of strengthening the island economy in preparation for possible independence, believes Falklanders should take the initiative before changes are forced upon them. "We cannot hang on to the apron strings of Great Britain forever." he

In Britain, the possible election of a Labour govern-ment next year could subtly shift the equation. Mr Tam Dalyeli, a Labour parliamen-tarian who questioned Britain's use of military force in 1982, says he would try to persuade a Labour towards some concept of independence".

The three Falkland representatives who attended the ABC conference last month will return to the islands bearing the message that "time is not on their side", Mr Dalvell savs.

"It is totally unacceptvery small tail to be wagging

'Human error' in Peru air crash

Human error may, after all have been responsible for last month's crash of an Aeroperu Boeing 757 in which all 61 passengers and nine crew died, according to a statement from Peru's air transport authority, the DGTA.

Three "static ports" in the aircraft fuselage had been found to be covered with adhesive tape, the authority said. The ports act as sen-sors to measure atmospheric pressure and the aircraft's height and speed.

Aeroperu spokesmen confirmed the static ports had been located among wreckage on the Pacific Ocean floor 25 miles north-west of

Until now, it had appeared the crash on October 2 was due to total and inexplicable computer failure. Recorded conversations between the co-pilot and the Lima control tower for the 29 minutes before the crash revealed no basic instruments functionknow their height, direction or speed. Thick fog meant zero visibility.

Mr Victor Girao, a former pilot and Peruvian aviation expert, said that if adhesive tape had been left blocking the air intakes after servicing, then responsibility would fall on the ground crew and the pilots. It was the obligation of the latter to make visual checks of the outside of the aircraft before

boarding. The task of recovering bodies and wreckage has been arduous. So far, only 55 of the dead have been recovered, with 34 identified. Attempts to recover the remaining victims are continuing. The flight data recorders have been sent to the US for analysis.

The Aeroperu crash is one in a series of South American disasters in recent months which have raised fears over the safety of air travel in the region.

Texaco battles to limit race-claim damage

By Richard Waters in New York

Texaco, the US oil company, was fighting yesterday to limit the damage from what, in the space of three days this week, has developed into one of the most damaging racial discrimination es against a big US corpo-

duce in Japan you don't sall

The packaging company estimates that it makes between a fifth and a quarter Cuba row

Sir Leon Brittan, the European Union's trade commissioner, will today urge the EU and US to settle their dispute over trade with Cuba and join forces to promote democracy and respect for human rights on the island. Sir Leon's call, to be deliv-

ered in New York, is billed by EU officials as an important diplomatic initiative. It is intended to mend transatlantic rifts over Cuba and lay the basis for better relations with the re-elected Clinton administration.

Sir Leon plans to pursue the initiative in talks with US trade officials at a business conference in Chicago tomorrow and on Saturday. He expects to use the talks to probe the US on President Clinton's trade policy priorities in his second term.

Sir Leon will stress that the Eli remains firmly opposed to the Helms-Burton anti-Cuba act, which Brussels is challenging in the World Trade Organisation. The act authorises private US court cases against for-eign companies "trafficking" in confiscated Cuban assets. He will also endorse for the first time proposals by Mr Stuart Eizenstat, Presi-

dent Clinton's special envoy on Cuba, for international co-operation to speed political reforms on the island. EU officials hope the initiative will help provide Mr Clinton with the political ammunition needed to per-

suade Congress to amend or

repeal Helms-Burton, which

he partly waived for six months in July. The officials would not say what, if any, further concrete measures were planned to underpin the initiative, insisting it would depend on

the US response. But Sir Leon is expected to seek support for his approach from US and European business leaders at the

He will stress that EU and US policies towards Cuba share the same aims: "We believe strongly that Europe and the US should work together as soon as possible to nurture democracy, freedom and human rights there," he will tell the European-American Chamber of

Commerce in New York. But be will argue that differences over Helms-Burton have driven a wedge between the transatlantic partners and created "misunderstandings". which have prevented them from co-operating productively.

"By opposing Helms-Burton Europe is challenging one country's presumed right to impose its foreign policy on others by using the threat of trade sanctions. This has nothing whatever to do with human rights. We are merely attacking a precedent which the US itself would oppose in many other circumstances, with the full support of the EU."

Sir Leon will acknowledge differences between US and EU tactics towards Cuba. But he will insist that Europe's policy of "constructive engagement" is genuinely intended to achieve reforms by encouraging the island to behave as a responsible member of the international community. He will deny that the EU

has "gone soft" on Cuba, pointing out that European leaders in June froze preparations for a trade agree-ment with the island because the Castro regime had not done enough to promote political reforms.

"Our determination to bring freedom and democracy to Cuba is every bit as strong as Cuba's. Now is the time for Europe and the US to begin searching for common ground, so that together we can bring Cuba into the international community, where it belongs."

UK NEWS DIGEST

US company in \$18m expansion

The US company Align-Rite International is to invest film (\$18m) on doubling the production of components at its south Wales factory, boosting the growing semiconductor industry in the region. The project, which is grantaided by the Welsh Office, will add 200 jobs to an existing

80-strong workforce. The company, which is based in Los Angeles, has been at Bridgend since 1984 and exports three quarters of its output. In deciding to site the project in Wales, Align-Rite has been influenced by the prospect of sales to the Welsh semiconductor plants of LG, the South Korean electronics group, and Newport Wafer-Fab, owned by QPL, based in Hong Kong. LG announced in July that it would open a semiconductor plant, employing 1,700 people, as part of a £1.7bn investment at Newport, south-east Wales. Nearby, Newport Wafer-Fab is building its second silicon wafer plant, in a £230m investment which will add 770 people to Roland Adburgham, Cardiff

BANK OF ENGLAND

Warning on strength of sterling

The Bank of England, the UK central bank, warned yesterday that the recent strength of the pound should not be used as an excuse for keeping interest rates too low. In an unexpectedly hawkish quarterly *Inflation Report*, the Bank argued that the pound's 9 per cent rise since August against a basket of other currencies would probably not exert an enduring downward pressure on inflation.

The Bank added that up to half of sterling's recent appreciation was the result of higher oil prices. This again should only depress inflation for a while, as prices overall in the economy move to a lower level than they would

otherwise have recorded. "We should not set an easier monetary policy now because of sterling's strength," Mr Mcrvyn King, the Bank's chief economist, said yesterday.

PETROL PRICES

Editorial comment, Page 15

Three to merge service networks

The petrol squeeze

agreed to merge their service station networks in the industry's first blg restructuring since a flerce petrol price war was launched by Esso earlier this year. About 400 jobs out of a combined workforce of 1,322 are expected to be lost as a result of the planned merger of the UK refining and marketing assets of Elf Aquitaine, Gulf and Murco.The new network of 1,500 service stations will make the new company the fourth largest petrol retailer in the UK

Three oil companies have

after Esso, Shell and British Petroleum. The new company will have an estimated market share of 8 per cent. It will be particularly strong in Wales, the English Midlands and parts of the south-east. Gulf, a wholly owned subsidiary of Chevron of the US, also plans to close its refinery at Waterston in west Wales by the middle of next year as part of the proposed link-up. _____Robert Corzine

NUCLEAR SAFETY

Irish government to back lawsuit

The government of the Republic of Ireland is to back a private lawsuit in the Dublin courts against British Nuclear Fuels (BNFL), operator of the Sellafield reprocessing plant in north-west England. The plant is about

180km from the eastern coast of the Republic of Ireland. Mr Brendan Howlin, the Irish minister for the environment, said the state authorities would offer financial and other assistance to four residents of the republic who are seeking closure of the plant because of its alleged threats to health and the environment.

The announcement follows a Supreme Court decision in Dublin last week which gave the go-ahead for the case to be heard in the republic. It rejected an appeal by BNFL that the action could not take place in a separate jurisdic-

The Irish government is to offer scientific, research and legal assistance to the four residents, and will conduct a "wide trawl" of international evidence to assist the case against the UK plant. John Murray Brown, Dublin

■ LABOUR PARTY

FT article sets off hair debate

Yesterday's political debate at Westminster was dominated by a single issue: Mr Tony Blair's hair. The spark was an article in yesterday's FT, suggesting Mr Blair, leader of the opposition Labour party, had dampened down his bouffant hairstyle as part of a complex strategy to win over Britain's women voters.

"This is the blackest day in the FT's proud history of journalism," raged a Blair aide. "They have printed a otally untrue story about Tony Blair's hairstyle which the business community will be totally astounded by." His team decided later that they had perhaps overreacted, and their fury was replaced by a lighter touch. My problem is not changing my hair – it's keeping it,"

national central banks. The Bank of England, for example, would intervene under instruction from the ECB in the repo market in the UK. The ECB's aim in changing interest rates would be price stability. Whether this would be achieved through direct targeting of inflation as in the UK or by the targeting of an intermediate measure, such as the money supply, is still unclear. There may be problems in A German model is likely to seen structing an aggregate be adopted in which the money supply measure, short-term money market without a long track record. interest rates, guided by this measure could be diffi-

> The question of which securities would be eligible to be used in the proposed European-wide repo is still a contentious one. In some countries, only governmentbacked bonds can be bought or sold through repo. But in Germany, for example, other

big US banks have com-plained that if the German system is adopted, it could already own a relatively big share of non-government debt - an unfair advantage. Some non-German banks fear they may lack a sufficiently large stock of eligible debt to be able to compete with banks used to the German system. Another issue currently dividing officials is whether strict rules on government bond auctions would continue under Emu. At present, some countries require banks to have a large, separately-capitalised office in the country if they wish to be primary dealers in government debt. Bankers fear that countries may keep, or even tighten, these

rules in an attempt to

become the dominant finan-

cial centre in the Emu area.

Business leaders to aim for currency consensus reach a consensus in the The CBI will also publish

By Stephan Wagstyl, Industrial Editor

Mr Adair Turner, directorgeneral of the Confederation of British Industry, makes no apology for the fact that the UK's business leaders cannot reach a decision on the biggest commerce issue facing the country – European monetary union.

There are wide differences ing Conservative Euroscepof opinion among the organisation's member companies, he says. Moreover, there is no need for the CBI to make a decision while eraments in the UK and in other European Union countries have yet to make. un their minds.

But he acknowledges that with the planned 1999 launch date for Emu approaching, it will become "increasingly untenable" for the CBI to try to keep all its options open. So, early next Graham Bowley | year, it will start trying to hope of reaching a final cision in June or July. If Mr Turner feels uncom-

fortable about straddling the divide over Emu, he does not show it. Nevertheless, monetary union will be the most contentious issue at the CBI's day annual conference next week. Mr John Redwood, a lead-

tic MP. will be ranged

CONFEDERATION OF

BRITISH INDUSTRY against Sir David Simon, the

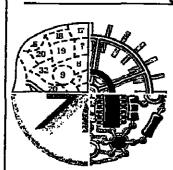

British Petroleum chairman, and other pro-Emu business men. Mr Redwood is the former cabinet minister who last year unsuccessfully challenged Mr John Major, the prime minister, for the leadership of the Conserva-

its second annual survey of business people's attitudes to the EU and Emu, the most comprehensive poll of its kind. Just as last year, it is expected to show a divide over Emu but an overwhelming majority in favour of continued membership of the union. Mr Turner himself concedes that the conference could send out contradictory sig-

nals about Emu. Mr Turner believes that the UK is well-placed to take advantage of the structural changes it carried out in the 1980s - such as labour law reform - and of the economy's recent good perfor-

Success depends on the government - of whichever narty - remaining committed to macroeconomic stability and to addressing important "deficiencies", such as the quality of education.

How to be more sensitive to stress

Acoustic microscopy – based on the principle that the speed of sound in a solid is altered by the presence of mechanical stress - makes it possible to build up a relatively crude image of stress patterns within a material.

Researchers from the **USNational Institute of** Standards and Technology in Maryland and the University of Cambridge have developed a more sensitive form of acoustic microscopy, according to a report in today's Nature.

They exploited the principle that stress in a material affects the polarisation and phase of a wave, as well as its speed. That produces interference between

waves that would otherwise remain in phase. By using acoustic waves of different wavelengths, it is possible to build up an image of stress in objects ranging in size from

microelectronic devices to welds in pressure vessels. University of Cambridge: UK, tel (0)1223 337900; fox (0)1223

Compact disc speeds internet

A hybrid CD-Rom designed to speed up commercial transactions across the Internet has been launched by Supernet, a designer of virtual shopping malls.

The compact disc acts as a data warehouse, storing some of the elements of the Web site. The text-based information and control software are held on the Web server, allowing the final Web page, incorporating graphics, movies and audio clips, to be constructed in real

The system is designed to foster electronic commerce by enhancing the appearance of Web catalogues and cutting the time taken to buy goods online.

A technique measures up

German researchers have designed an automatic measuring technique that could cut the cost of made-to-measure clothes to just 10 per cent above off-the-peg prices.

The technique involves recording a customer's silhouette using a video camera. A computer converts the outline into data representing body measurements.

These measurements are compared with standard clothing sizes, allowing the cutter to receive precise instructions about the required alterations. The system has been devised

by researchers at the Berlin College of Technology and the Fraunhofer Institute for Production Systems and Design Technology.

Production Systems and Design Technology: Germany, tel 3039006201; fax 303917517.

t the height of the Aids scare in the late 1980s, scientists began to dream of a product that would eliminate forever the need for blood transfusions. Almost a decade later synthetic blood is nearly ready for market.

At least six US companies -Baxter, Enzon, Northfield Laboratories, Biopure, DNX and Somatogen, in partnership with Eli Lilly - are testing blood substitutes this year, and Baxter and Northfield are about to launch clinical trials, the last step prior to review by the Food & Drug Administration (FDA)

Ironically, synthetic blood is completing testing at a time when developed countries say their blood supplies have never been safer. With modern screening, the risk of contracting HIV, the virus that may lead to Aids, or hepatitis through a transfusion has become very small. Yet companies continue to believe there is a strong market for substitutes.

The public and many physicians are still receptive to the idea of synthetic blood, say developers of such products. "The risk " of contracting HIV through a blood transfusion may be remote today, but the fear remains," says William Freytag, senior vice-president of Somatogen. "We never know when the next disease may rear its head. If you receive blood substitutes, you don't have that nagging doubt 10 years later that you may have contracted a horrible disease from the transfusion."

Freytag says Somatogen's surveys have shown that both doctors and patients are keen to try the products. Even at its best, synthetic blood is not a full replacement, since it cannot perform all the complex tasks of the human circulatory system. It may be an effective stop-gap measure, however, during times of excessive blood loss. Many victims of gunshot wounds and severe cuts die from too much

Some blood substitutes are shortage of the real thing.

nade from fluoro-chemicals Whether or not there is a blood made from fluoro-chemicals related to Teflon. Others are genetically altered versions of human and animal baemoelobin. All can take over a vital task of ble for voluntary blood drives human blood: they carry oxygen to important organs such as the brain and heart, and shuttle away carbon dioxide.

made completely safe, say developers of blood substitutes, synthetic blood may be desirable under certain circumstances. The substances all have a shelf-life of at least six months, compared to just six weeks for real blood. Because blood substitutes oper-

Science Picture Ubrary

Synthetic blood products may prove useful in emergencies, says Victoria Griffith

Blood brothers

ate under a "one size fits all" standard, proponents say they may prove especially useful for emergency treatments of trauma victims, or when something goes wrong on the operating table.

"We foresee surgeons having synthetic blood on hand for emergencies, something to tide the patient over until the blood bank can be contacted and a suitable match found," says Thomas Schmitz, head of Baxter's blood substitutes division. Developers of synthetic blood also believe the substances could be important as a back-up when there is a

shortage in developed countries is a controversial matter. The American Red Cross - responsiaround the US - says that on a yearly basis, nationwide, it has always met demand for blood. Yet the organisation admits that Even if the blood supply can be in certain parts of the country and world, at specific times of the year, there is a shortage. It is common, for instance, to hear appeals for donations around Christmas, when most people are

too caught up in festivities. These periodic dips in supply will worsen, predicts Freytag of

Somatogen, "The population of young people who give blood is static, while the population of those who need blood - particularly the elderly - is growing," he says. "Each year, the world needs 7.5m more litres of blood than it did the year before. Eventually that will mean disequilib-

rium in the market." Yet some physicians see profound risks in the use of synthetic blood. One concern is that the Teflon-like substances do not hold enough oxygen to make a real difference to the patient. Modified haemoglobin also has potential toxicities. Haemoglobin binds to nitric oxide, which is produced in small amounts in the human circulatory system to

relax blood vessel walls. "As the haemoglobin soaks up the nitric oxide, the relaxant function disappears," said John Hess, a physician and researcher at the Walter Reed Army Insti-tute in Washington, DC. "That's a big risk for someone with high blood pressure.'

Physicians are also worried by the impact of haemoglobin on the immune system. The breakdown of haemoglobin in the body activates the production of white blood cells, leading some to fear that transfusions of modified hae-

moglobin could trigger a dangerous auto-immune response.

The doubts are having an impact in the industry. This summer, in a vote of no confidence, Pharmacia & Upjohn took a \$70m charge against earnings to drop a contract with Biopure for the development of synthetic blood. Enzon believes the market lies

only in specialised applications for blood substitutes, such as extra oxygen for stroke victims. "We don't see this as a product for elective [non-emergency] surgery," says Peter Tombros, chief executive officer.

Enzon hopes to use synthetic blood as an aid in cancer treatment, to flood tumours with oxygen during radiation treatment. The extra oxygen, researchers believe, makes the tumours more susceptible to treatment.

Despite the concerns, synthetic blood continues to hold a number of faithful adherents. "Human blood is inherently dangerous." says Harvey Klein, a researcher at the National Institutes of Health and a champion of synthetic blood. "The blood supply may be safe now but there is no way to know if it will remain safe. Because of these risks, synthetic blood could prove a very useful medical tool."

A glass raised quietly

business traveller's casis, are not like the average refrigerator. They must operate silently, which means most use a process called absorption technology tather than the normal

mechanical compressor. However, the absorption process, which involves heating a mixture of water and ammonia, consumes more energy than an equivalent compressor-based system. Until recently it could only be controlled by a simple on/off type of thermostat common to

most refrigerators. Now Ranco Controls, part of the UK's Siebe engineering group, has developed a range of intelligent microprocessorbased controls capable of learning the optimum moment to start either a cooling or defrost period within a refrigeration system.

The new E76 control, plus a cabinet and a cooling unit optimised for "fuzzy logic" operation, has enabled Electrolux, the Swedish-based appliance group, to cut energy consumption for its new generation of botel mini-bars by 40 per cent. Half the saving is attributed to the control.

Fuzzy logic appliances have controls that sense and adapt to their surroundings. Japanese appliance users are particularly keen on them, but their use is spreading in the

The patented software in the Ranco control senses the cabinet temperature and other variables such as outside air temperature and different load conditions. It then adjusts the heater power of the water/ammonia mix to maintain a constant temperature, ensuring no energy is wasted by cooling too much or

too little. Graham Bailey, chief electronic engineer at Ranco's research establishment in Germany, says the control could be used for a wide range of energy-saving cooling and heating applications.

Andrew Baxter

The new year in the DM market for intérest-rate products starts on November 12, with the launch of the One-Month Euromark Future at DTB. With short dated maturities extending into 1997, the usual year-end interest-rate expo-

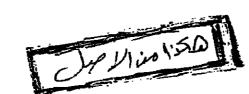

sure can be eliminated. Hedging with an One-month LIBOR futures contract will be possible in Europe for the first time.

But that's not all: a Three-Month Euromark Future with serial contract months will be introduced on January 14, 1997, making DTB the only derivatives exchange to offer the most important DM products in a spectrum of one month to ten years. With the conversion of Europe's benchmark currency, into Euro,

the DTS will have the perfect product range to provide you with more reasons to celebrate. Wishing you all the best for a prosperous new year.

A licence to play

irst let us roll a tank Collins. Why couldn't the film away's message. For all the maps into the debating arena and fire on notions of "historical accuracy In its portrait of the father of the IRA, Neil Jordan's Michael Collins has been accused of multiple distortions. It introduces an armoured car into a football ground massacre actually perpetrated by select soldiers with rifles. It falsities the role of Irish leader-to-be Eamonn De Valera who (we wouldn't know from the film) helped to initiate the very Anglo-Irish treaty that he rejected when Collins brought it back from Westminster, sparking the civil war that would end Collins' life. And at least one supporting character is killed off who in true life lived on till pensionable old age.

But to those who call the film a howler-ridden history lesson one should respond, "When was historical cinema ever accurate?" The same critics who inveigh against Jordan would sign affidavits to the greatness of Eisenstein and Abel Gance, infamous distorters, and would no doubt queue to see plays by Shakespeare and Schiller, even worse fibbers.

My quarrel with Michael Collins is not that it allows an imaginative medium to use its imagination, but that it does not magine enough. The main void is evident immediately. Liam Neeson's Collins is a hulking noble peasant with little that passes for inner complexity. Whether ranting from a soapbox, romancing his beloved Kitty (Julia Roberts) or recruiting his assassins, he is a pin-up yeoman whose moments of scripted anguish seem purely token.

Where this hero's simple heart is mightler than his brain, the real Collins was an ex-banker who after ten years in London became a sophisticated debater and Minister of Finance in the Dail cabinet. Again, distortion qua distortion is not the grievance. What matters is that the change reduces rather than increases the character's com-

Though Jordan gives us fine battles and crowd scenes - his early-century Dublin is pulsingly recreated - the human drama never comes alive. Collins's love for Kitty, even spiced with rivalry (Aidan Quinn), provides a series of vapid dramatic intermissions. And whenever Alan Rickman comes on screen - a wired-up political boffin with sudden chokings of violent emotion - we think, "Wait. This man is much more interesting than

have been about De Valera?" By the time the climax comes, complete with cliche cross-cutting between the doomed hero and the bride donning her wedding dress, we have seen a poten-

tially mesmerising subject reduced to bland slab of hero worship. Michael Collins is not real, nor is it interestingly unreal. It is history as lying in state: the dullest "lying" of all.

The past is far more enthralling in The Pillow Book. Peter Greenaway gives us a random-access costume fantasia, mostly without costumes, about love, sex and

> MICHAEL COLLINS Neil Jordan

THE EIGHTH DAY Jaco Van Dormael

THE CRAFT Andrew Flemming

> FLED Kevin Hooks

calligraphy, conjured from an imagination at once pure and unpurified.

If art is a licence to play, this glorious film takes its freedom seriously. All is logical from the moment we accept that Nagiko (Vivian Wu), who as a child had birthday greetings written on her face and lips by her father, grew up obsessed with the notion of skin as writing paper and - short but momentous step - of art as inextricable from sex

She persuades her men to daub her body, or she transforms them into breathing, naked manuscripts tattoed with her thoughts. Meanwhile Greenaway explores the "skin" of the movie screen. Images within images, words fly-ing across the frame, Japanese prints tucked into corners like cartouches: all this accompanied by gorgeously dotty polycultural

pop music. This is higher cinema. Indeed Nagiko's longest-lasting lover raises the story to an almost Shakespearean level. Played mostly in the nude by an imperturbable Ewan McGregor, he loves her, loses her and finally tries a Romeo And Juliet-style "death" to win her back.

But nothing in human life goes

we draw on ourselves and others, death is the only sure destination. Love, passion, art and literature are merely ways of getting beautifully lost en route.

Greenaway himself has often seemed un-beautifully lost, but not here. The Pillow Book, like The Cook, The Thief, His Wife And Her Lover, has a thrilling controlled abandon. Though perfectly formed, it is also passionately erotic. And though offering little in the way of "characterisa-tion" - the girl and her lovers are translucent Everypersons - its connective suggestiveness makes us feel we are all characters in this story at once teasing and momentous.

Jaco Van Dormael's The Eighth Day, from the director of Toto The Hero, sets new standards for winsomeness. Its main characters are overstressed businessman Daniel Auteuil and Down's Syndrome sufferer Pascal Duquenne, whom he befriends during many a wacky, would-be touching adventure, until Duquenne helps out a troubled society by throwing himself off a tall building.
This is Rain Man for the art

crowd. Auteuil learns to love the disordered Georges. Georges in turn teaches Auteuil to love life more than business. "Laugh, Harry, laugh!" he urges. And Harry does. And Harry loves and cries and lets off ffreworks and learns to spend more time with his wife and children. And Dormael too, after this film and its reception (it was roundly booed at Cannes), may find that he has more time to spend with his fam-

tion - has lost its capacity to surprise and delight. Even the famous juke-box, and the laughter it induces at Sparafucile's riverside bar, jars with the bitter fatefulness of the final act. This is a production which thrives on novelty, and David Ritch's sub-

tly-lit revival cannot provide it.

The biggest disappointment is Janice Watson's role-debut as Gilda: she may have the voice for "Caro nome", but she sings it in a dramatic vacuum. Stiff and wooden, she is more frigid than fragile. Bonaventura Bottone's ageing playboy, a spiv with a quiff, makes a welcome comeback, though the voice sounds pushed to its extreme, John Connell is an exceptionally fine Sparafucile, and Jean Rigby repeats her classic Maddalena. Peter Sidholm's Rigoletto brings noble desperation to "Cortigiani" ("filthy bastards" in Fenton's version), but he would be far more effective in a traditional setting.

Dance

Stamina on speed

odies flying, twisting and slamming to the ground like fish out of water. An air of danger as dancers just miss – or just catch - each other. A suspicion that the stage has been electrified and that rag-doll girls and sweaty chaps are being jerked by galvanic shocks.

This is the movement language evolved by the Canadian choreographer Edouard Lock for his La La La Human Steps troupe during the past decade. It is a style intriguing enough for about 20 minutes. Thereafter I find an urgent need for something less aggressive, less shortbreathed. This is art for an anxious generation, for a public to whom dance is a branch of tagwrestling, with daring more important than invention, and exhaustion (at least on the part of the dancers) a criterion of

For these devotees, Lock's new work – which has the shortest title on record for a chorecgraphic piece: 2 - is catnip. It has arrived in London at the marky Peacock Theatre - the ci-devant Royalty, and no better for the re-naming, but now the base for Sadler's Wells' activities as part of a two-year tour. If the dancers survive the punishment they take each night in performance, they will deserve med-

The piece is entirely characteristic: four girls, four men – dressed in de rigueur black - twist and cut mainly balletic steps with ferocious speed. They collide, touch, and pass on. They mix academism, break-dance and slamming, disco and the razorflash of tango legs. (Some of the incidents are like knife attacks.) Exhilarating for a short time. the piece merely goes on without going anywhere in particular.

The accompaniment uses baroque music played on two harpsichords on stage (and one of them seems to have been doctored by an electronic saboteur since it produces fearsome growls and clangours) then sinks to pop-trash, with intermittent static as a delicate reminder of how distracting noise can be. Metal grilles define or enclose the stage area. At his best - in a quartet for the men in which they grapple and run, tripping over one of their number on the ground - Lock creates a theatre of real tension. At his least convincing, we see the same coarse expenditure of energy repeating time and again.

An incidental annoyance of the evening is the showing on a creen of film of the dancer Louise Lecavalier (a dandelionheaded blonde) eating pap, while on another screen she is seen. heavily made-up as her aged self, looking like Andy Warhol in drag. The company dancing is impressive in its stamina and catch-as-catch-can daring, though the girls' knee-pads are not the most winning fashion accessory. (They have rather

old-fashioned legs.)
The Peacock Theatre, lurking in the bowels of a building and clearly inspired by Warren Street tube station, is spacious, with perfectly hideous decor, combining the worst aspects of municipal thrift (the light fixtures are brutes) and the aesthetic grace of a multi-storey carpark. The splendid Stoll Theatre used to occupy this site. A murrain on those responsible for the present glumness.

Clement Crisp

pera's two biggest seducers are back in town, but somewhere the road they have lost their sex appeal. Don Giovanni returns to the Royal Opera in a revival of Johannes Schaaf's 1992 production; at English National Opera, the Duke of Mantua is still spinning "La donna è mobile" on the jukebox of Jonathan Miller's 1982 Rigoletto. Two productions deemed to have taken a fresh view when new now seem dated and dull. Instead of emphasising their strengths, this pair of reviv-

als lays bare their weaknesses. Don Giovanni celebrates justification for its return. Whether or not you like the production's sadistic viewpoint. Allen is its irresistible life-force. The voice may be fraying at the

Thomas Allen's 25 years at Covent Garden, and he is the sole edges, and the champagne aria has to be carefully managed, but

Allen's artistry - intelligently conceived and intensely physical – reigns supreme. His command of tone and line is enough to give a single word like "sposeremo" a double edge; even his laughter and caresses are threatening, and he makes fantastically expressive use of his hands. The performance is a well-deserved per-

sonal triumph. But this remains a Giovanni who threatens rather than seduces, who is addicted to power, not sex. Allen convinces us that Giovanni really is an aristocratic thug, and the scenes of domestic and street violence carry a strong contemporary resonance. But take away Giovanni, and Schaaf has nothing to say:

the other characters are a parade of glums who could have fitted a 30-year-old production. What makes this performance

so disturbing is its humourlessness, its lack of sensuality, its dowdy predictability, and its use of extras to mask a poverty of stagecraft. Patrick Young, the revival director, has missed a chance to re-order its priorities; on Monday night, for all the dim allure of Peter Pabst's sets, Covent Garden's geriatric scenechanges almost stole the show. Next to Allen, the most rewarding performance came from Lucio Gallo's practised Leporello, his native tongue adding a welcome crackle to the exchanges with his master. Here is a Gio-

vanni-in-the-making; so, too, is Tómas Tómasson, whose Royal Opera debut as Masetto is distinguished by a fine voice and dramatic presence. Felicity Lott, looking like a maiden aunt, brings nothing distinctive to Elvira; Yvonne Kenny's Anna and Anthony Rolfe Johnson's Ottavio have seen better days, and Alison Hagley's Zerlina misses the sexy allure she brought to Nicholas Hytner's Munich production, Robert Lloyd is the ever-reliable Commenda-

Economic Viewpoint · Samuel Brittan

Myths of fiscal puritans

Unless modest tax adjustments are made by the UK chancellor to offset spending economies, the tax burden is on an insidiously climbing path

The buzz is coming from all sides. "The chancellor ought which many commentators are too hairshirted to really to be talking about tax increases rather than tax cuts." We are also told emphasise, is that chancelthat anything that the Trealors have to cut tax rates. sury can shave off the pubincrease thresholds, or the lic spending totals should be equivalent, simply to keep the tax burden where it is. used to reduce borrowing The tax system is partially indexed against inflation, as faster. Five out of six of the Panel of Independent Forecasters are against anything that looks like tax cuts. Nevertheless, this is a bandwagon, however high-

brow, from which one should stay clear. Some of progressive tax system. those on it have a halfconscious conviction that cal drag" by those who disour incomes belong to the state; others have a visceral dislike of "Conservative tax cuis"; and yet others, whose politics may be different, per cent of gross domestic suffer from innate pessi- product or £2bn per annum. suffer from innate pessimism. These elements are This may not appear much. But if a sum of this size is linked by a feeling of pernot returned to the taxpaver sonal virtue in arguing a supposedly unpopular course. Nevertheless, what in an average year, we are drifting to an ever higher the bandwagon lacks is contax take. vincing arguments. The most illogical position of all is that of those who do not dare to advocate an increase

in tax rates, even if there are no public spending economies, but who still oppose the slightest trimming in tax rates if such economies can indeed be found. My case rests on two simale propositions. First: if the chancellor can cut the Treapath for the swing back to sury's "control total" by as surplus, but started it from little as £2bn from the a more adverse point.) £268.2bn previously pen-cilled in for 1997-98, that amount should go towards what the Bank of England what the newspaper head-

This is a matter of simple psychology as well as fiscal arithmetic. How should a spending minister feel if anything he concedes from his earlier spending bid has no visible effect on the taxes people pay but is lost in the numerous influences which affect the Treasury's borrowing projections on Budget day? And will that make his department more co-

lines will call tax cuts but

which will really be tax sta-

The chart should help dis-

thresholds rise with prices. But it is not indexed against rising real incomes. A larger and larger proportion of these are taken in tax in a This is known as "real fislike the process and as the "fiscal dividend" by those who do. It is estimated by the Treasury at just over 0.2

Let me insist that I am arguing for a modest tax adjustment no greater than the modest spending economies the chancellor may have achieved compared to his previous base line - and assuming that the Treasury makes no drastic pessimis tic revision to its fiscal projections. (In the chart I have taken the Treasury's 1995

Such adjustments are entirely compatible with

operative in future rounds? calls "an appropriate fiscal least 10 years from 1979 to has only been so good. The second proposition, policy". I am simply taking 1989. More important is the because inflation has turned as a datum the fiscal paths projected by nearly all independent analysts when they expect public borrowing to fall towards negligible levels by the turn of the century.

> pel any impression that British public finances are out of control. As recently as 1988-89, there was a very large public sector repayment equivalent to 8 per cent of gross domestic product. (So much for the myth of Nigel Lawson's irresponsible tax-cutting Budgets.) The swing back into deficit in the early 1990s was partly a control loss but even more the automatic effect of recession. Some half of the deficit, about which Mr Clarke complained so much when he became chancellor in 1993, has already disappeared, even though the

decline has been less than projected. This was, itself,

partly the result of the eco-

nomic slowdown in 1995-96.

Contrary to what many suppose, the official projec-tions do not assume another boom like that of the late 1980s. They simply suppose a slow return of output to its underlying trend by the end of the century. It is wrong to assert that because output has for several years been below its long-term trend, it must soon rise above it. This view overlooks how very long the

whole of a business cycle. Indeed, it is only to be expected, on mainstream macro-economics, if inflation is moving downwards. This is the price that has to be paid either for reducing inflation or for letting it get high in the first place.

Most estimates of a stable budgetary balance lie between a deficit of 1 and 2½ per cent of GDP. The higher figure should be sufficient to stabilise the debtto-GDP ratio, while the lower one fulfils the "golden rule" of botrowing only to finance capital spending. (The Private Finance Initiative does not yet make much difference to the Budget arithmetic.)

Some puritans do not the Treasury's spending projections, which they say assume too tight a restraint. But cynicism can be carried to the point of silliness. In fact public spending has been under remarkably good control in recent years.

The accompanying tables, kindly extracted by Gary Young of the UK National Institute, show how remarkably close outcome and projection have been in recent years. The actual or estimated outcome is compared with the Treasury's Budgettime projection and also its

business cycle has become projection a year earlier. the last one went on for at Some argue that control Public spending projections and outcomes. Real growth in control total (%) 1985-04 1994-95 1995-98 1995-97 Projected 2 years before Outcome + 40 77 02 Title 1989-84 1984-95 1985-96 1986-97

fact that output can be out better than predicted. below trend even over the But that has not been so in every year. In any case the first table gives that outcome in real terms and the second as a proportion of GDP. The Treasury has indeed been on average slightly overoptimistic but by an amount corresponding at present values to about 20.7bm - or

less than the fiscal dividend. We are left with the final fustification for fiscal tightening. This is as a counterinflationary weapon to reinforce the recent base rate increase and reduce the number of future increases which the Bank envisages in its new Inflation Report. In fact, fiscal management has not been used in this way since 1974, when chan-cellor Denis Healey reduced

The present doctrine is that monetary policy should be used to adjust demand and that fiscal policy should aim at a stable long-run balance between expenditure and receipts. Temporary cyclical swings into deficit or surplus then act as "automatic stabilisers".

indirect taxes before the

October election.

The present view is more nearly correct than the one it succeeded. Fiscal changes take far too long to take effect and are far too uncertain to be of much use in managing demand. Tim Congdon, one of the panel most resolute in his advocacy of a tight budget, nevertheless argues that "monetary measures are far more important" for inflation control "than fiscal, as fiscal action has probably little effect on national income except in the short run".

Over the past two decades, nearly all economic management errors, both in an inflationary and a deflationary direction, have been monetary. Hardly any have been due to fiscal policy, the impact of which has been hard to discern.

BOOK HEVIEW Pair Wyners A GUIDE TO STOCKPICKING, By Gillian O'Connor Century Business Books, 398 pages, £14.99

Do-it-yourself for equity investors

ford Universi- vou. ty's graduate business school, invites his annual MBA class to imagine the entire adult population of the US standing on their front porches at 8am Pacific time to toss dollar are eliminated, forfeiting their dollar. Those who toss heads repeat the exercise on successive days until the last to lose scoops the pot

After 23 days, only 23 peo-ple remain of the more than 190m who started. Prof Par-23 should do. Most students propose variants on selling shares in the winnings.

Prof Parker offers an alternative: rush out the first book on Flipping Dollar Coins: My Secret to Winning. It would stand beside other airport books giving tips on how to get rich.

This book by Gillian O'Connor, the FT's personal finance editor, is the latest to join the shelf. It starts with sound advice: "If you do not find picking shares a wonderfully enjoyable challenge, don't pick shares. Buy an index-tracking trust and spend your leisure doing something you do enjoy."

What follows is a wellresearched, accurate, wideranging and up-to-date over-view of the world of professional investment on both sides of the Atlantic. But this is no guide: it is a compendium of theories and examples.

O'Connor assumes that readers begin by not knowing where to start; if so, they are likely to end with a knowledge of some exciting routes and some absorbing navigational techniques, but not necessarily be a great deal wiser about which direction to take.

At the outset we are told

George Par- monitoring process. "The ker, associate important thing is to choose

But how long will it be before readers know if their chosen systems work? A long time clearly, because it takes years to assess an investment record. Along the way, beware of trusting coins. Those who toss tails too much money to your stockpicking skills while you are still learning the ropes.

Among those quoted in the book, Mr Peter Lynch, who used to run Fidelity's Magellan fund, the largest in the world, admits: "I never had an overall strategy." Yet in some respects,

O'Connor appears sympathetic to Mr Lynch's man-onthe street philosophy of buying shares in the companie you like as a consumer. Certainly his approach is more likely to appeal to the reader than techniques employing complex chart analysis and portfolio construction using computer-based theory.

It is true that profes investors find it hard to beat the market. Undoubtedly turnover costs are a big penalty. But is it realistic to say that professionals have a hard time because their "clients...have unrealistic and conflicting demands and expectations"? Do most amateurs really care any less about performance and not keeping up with the Joneses on the benchmark index?

Among professional investors, Mr George Soros receives respectful attention (although surely he is no stockpicker?), but Mr Warren Buffett holds centrestage - for his remarkable record, and even more for

his wit and sagacity. Arguably, the way in which Mr Buffett's thinking on the subject of stockpicking developed and the decisions he made offer more of a guide than any of the

Professor plined stock selection and covered in this book. Mr Buffett's views on selectiveness in portfolio dean at Stan- a system that works for construction are especially sound: "If you have a harem of 40 women, you never get to know any of them very

> Here is the true difference between professional and amateur investment. There is indeed an opportunity to make exceptional returns for amateurs willing to risk a great deal on their judgment of what constitutes an exceptional business at a fair price, ignore the "churnover" (excessive turnover) of the market, and spend long periods holding surplus cash in large quantities when share indices are rising.

> But it took Mr Buffett decades to refine his approach. And although O'Connor asserts that be performs value analysis using the risk-free rate of return, Mr Charlie Munger, Mr Buffett's partner, has said that he has never seen him working a discount model. To which Mr Buffett quips: "There are some

things you do in private." sensible financial decisions, they need to have a basic understanding of what drives financial markets, and the costs and benefits of investing in different assets - even if they do not manage these assets on a daily basis. More widespread understanding of wealth management is both desirable and fessible, and O'Connor's book provides an excellent foundation. Whether readers will emerge as the stock selection superstars of the future, however, is more open to question.

The reviewer is chairman of Gartmore Investment Management A Guide to Stockpicking is available from FT Bookshop by ringing Free-Call 0500 418 419 (UK) or +44 181 964 1251 (outside the UK).

Emu could be put to the test by running currencies in parallel

From Mr Chris Fogg. Sir, The issue of Emu is dividing politicians, economists and could change the government of the UK. Frankly I do not believe anyone knows whether the outcome will be positive or negative, as this depends on what happens to the different countries involved, both before and after the scheme

comes into effect. Many people are nervous about joining a scheme that could not only have adverse effects but also restricts the government's ability to rectify the position. It also

seems to be a large, irrevocable step towards a federal Europe. My solution? A two-tier

arrangement in which the government would deal with Europe in euros, while resident companies and individuals in the UK could use either pounds or euros. Companies would then trade with Europe in euros but retain flexibility for other markets. Individuals would be able to open bank and savings accounts in both currencies. Companies could discuss with their employee

whether they wanted to be

paid in pounds or euros - a real life referendum.

This solution in fact already works. Many compa nies trade overseas in US dollars while they maintain their affairs in the UK in pounds I would propose the two methods work side by side

until it becomes clear whether it would be advisable to convert to a single

A turn up a blind alley on Keynes

From Mr Robert Bonner.
Sir, in "Spurning Keynes"
(November 4), methinks America columnist Michael Prowse doth protest too much – particularly about a man once described as the "providential saviour of the bourgeois order", one who "came to save the system,

not to bury it". "Today, after a diversion up Keynes's blind alley," Prowse writes, "economists seem again to be reverting to the traditional view that the flexibility of markets – not government intervention is the key to lasting prosperity and high levels of employment."

Here it happens to be Prowse who has taken a turn up a blind alley. What, after all, was Prowse's reason for juxtaposing markets and government? The history of the present already proves that markets themselves tend towards one form or another of inequity and dictatorship. To argue that the "flexibility of markets - not government intervention" is the key to a more prosperous world is to argue nothing. For it leaves unasked, let alone unanswered, the critical ques-

end does greater prosperity mean for the mass of humankind? As the UN development issues in its 1996 Humo

tions: might not a govern-ment be democratic (with a small "d")? And what in the

programme formulates the Development Report: "What are the benefits to human

development, and what are the costs? Who benefits, and who pays?" These are the humanly meaningful ques tions that Prowse's overly rizid markets-versus-government mindset excludes from

consideration. Prowse's "spurning" of Keynes (and everything that Keynes's name has come to stand for) smacks of something else, I'm afraid. Ultimately, it is the human dimension of Keyneslan economics that Prowse spurns. There is no "market" clever enough to save us from that dead end.

10931 S Western Avenue, Apt 207. Chicago, Illinois 60643, US

this claim is expressed through the tax and social security system or via the right to receive interest and dividends. Indeed, if "funded" pension plans are

Furthermore, it is arguable that the funded systems existing in the UK and the US have simply laid the foundations for the longest and deepest bear market in history in the early quarter of the next century, as the retiring baby-boomers start to liquidate their savings by selling them to - who? Arguably for those affected this will be just as cruel a deception as default by governments on their

unfunded pension promises. As it happens, there are good reasons to prefer funded pension systems to unfunded ones - but don't let's pretend they make the problem disappear.

Benjamin Meuli, managing director. J.P. Morgan, 60 Victoria Embankment, London EC4Y OJP, UK

Fair use of competitive advantage

Sir, Caroline Southey ("EU ducks WTO labour rights issue", October 30) reports that the EU sees developing countries using low wage rates to gain competitive advantage as a problem. Surely if a company or a country can produce a product more cheaply than others, it is perfectly legitimate for it to use that to its own commercial advantage. The real problem arises

From Mr Jeff Atkinson.

when costs are kept low and competitive advantage won by denying workers their fundamental rights to, for instance, a safe and healthy working environment or an adequate diet - and when those who try to do something about this are harassed, imprisoned or

What Oxfam and the trade union movement want discussed at the World Trade Organisation meeting is not

the low wage advantage of developing countries, but the use of trade agreements to protect workers' basic rights - including the right to organise and bargain collectively - as laid down in International Labour Organisation conventions.

Now it's the world, stupid

presidents tend to find their attention turning from the home front to the wider world. Stymied by domestic opposition, they discover in foreign affairs greater scope to leave a mark on history. Will Mr Bill Clinton, who once proudly abjured foreign policy pretensions, now adopt a similar course?

There is every incentive. The Republican-controlled Congress will want to shape the domestic agenda. More than that, Mr Clinton - after the painful early learning curve - has shown himself capable of a surer touch in foreign affairs over the past year. His task now is to translate that into leadership.

The first term contained good and bad. Time was wasted in fruitless confrontations with China over human rights and Japan over trade. US blundering contributed to a dangerous split among the western allies over Bosnia and the future of Nato. The debacle in Somalia caused Mr Clinton to turn away from the United Nations. An electioneering president signed legislation that sparked unnecessary rows with Europe over trade

with Cuba, Libya and Iran. More positively, Mr Clinton secured beneficial trade agreements; acted decisively in crises on the Korean peninsula and in the Taiwan strait; and pressed his mediation services - to trance has hampered efforts to varying effect - on warring parties from Northern Ireland to applies crucially to strategic the Middle East. More often concerns such as the continuing than not, his instincts have crisis in the former Yugoslavia. favoured international engage-

isolationism and mercantilism.

American a coherent framework for US strategic and economic interests administration's approach has often been ill-co-ordinated, lacking in political weight, and prone to manipulation by vested interests. The resulting policy lurches have infuriated allies and left other important part-

ners off balance. To an extent US foreign policy is bound to be reactive. The public shows no appetite for moral visions of America's role. In any case, contemporary crises do not all lend themselves to clear-cut solutions made in Washington.

Nevertheless, there are ways in which Clinton mark two can do better. One is to appoint a new foreign policy team with political clout. This will be particularly important given the contentious issues such as the global integration of China, Mr. George Mitchell, a former Senate majority leader, would be a good secretary of state.

As important, the president needs to show he understands that international problems are best settled by multilateral rather than unilateral action. and that without US leadership the effectiveness of multilateral action is severely undermined. That applies to trade, where America's election-year recalciextend liberalisation. It also

EMI talks tough

Two of the main characters in by the EMFs lecturing. Central the European single currency drama yesterday revived an old favourite - the good cop, bad cop routine. Both played their part rather well. But those who want to make a long-term success of monetary union ought to have listened to the bad guy.

The temptation for most governments will instead be to take comfort from the words of the good cop, appearing in Brussels. In its latest twice-yearly report on European economic proscts the European Commission painted a glowing picture of progress towards monetary union. It claimed the end was in sight: 12 countries would meet the Maastricht criterion that has caused the most trouble, by reducing their general government deficit to 3 per cent of GDP or less by 1997.

But then came the bad cop of Frankfurt, also known as the European Monetary Institute. In its first official convergence report the forerunner of the European Central Bank was rather more sparing in its praise for recent deficit reduction efforts. It complained that "progress in fiscal consolidation has generally been too slow".

The authors laid down an important marker in arguing that neither one-off measures before 1999, nor the promise of a fiscal stability pact thereafter was a substitute for decisive action now to rein in public borrowing by many would-be Emu members. Without such efforts, it argued, the financial markets could well size up the long-term fiscal implications of high European unemployment and an ageing population and find the

euro-area wanting. · Few will have been surprised

bankers are supposed to sound tough - particularly when they have not yet had the opportunity actually to be tough. As the likely list of members of Emu expands, Germans, especially, need plenty of reassurance that the euro will not be softened by the inclusion of upstarts such as Italy and Spain.

Many, then, are likely to listen respectfully to the EMI's warnings, without taking them to heart. After all. everyone knows that it is politicians, no central bankers, who will really have the final word on which countries qualify for Emu. So why not stick to the European Commission's version of events? It may be unrealistic, but so are most politicians.

In their hearts, however, those who seriously wish Emu to work know they cannot afford to be so cavalier. First, even the Commission's rosetinted spectacles cannot blind it to all the potential flaws in governments' souped-up 1997 budget plans. Italy, for example, is betting on a 2 per cent growth rate next year to help it reach its deficit targets: the Commission reckons it will grow by only 1.2 per cent.

Second, and more important. the financial markets have so far been all too willing to give politicians the benefit of the doubt in their optimism about Emu. But somer or later investors will want to see the fine words about fiscal stability supported by the numbers on individual countries' balance sheets. The precise timing, and membership of Emu can be fixed by political sleight of hand: its long-term credibility cannot.

After the celebrations

A Republican Congress and the shadow of Whitewater could make Bill Clinton's second term a challenging one, says Jurek Martin

treason and plotting Britain, but November 5 in America was Thanksgiving and Christmas rolled into one. Rarely has

It gave Mr Bill Clinton a solid vote of confidence by returning him to a second presidential term, on the back of victories in 31 states and with 109 votes to spare under the electoral college system. Pending the final count it may even have added the psychologically important wrapping of 50 per cent support in the popular vote - better, in any event, than the measly 43 per cent of

four years ago.
It enabled Mr Bob Dole, his Republican opponent, to retire in the sort of landslide that has engulfed other losing presidential candidates. Nor did he drag his Congressional party down to defeat with him. By holding on to their majorities, the Republicans managed to win two consecutive elections for Congress for the first time since 1930. Mr Dole's final concentration on California may have helped save vital west-ern seats in the House of Repre-

This translates into a sense of public satisfaction. Americans may not entirely trust their president, but they think he is pretty good at managing their affairs, especially the economy. They also again proved they do not mind divided government, with, this time, a Democratic president counterbalancing the more conservative inclinations of a Republican legislature, and Congress keeping careful watch on the nation's chief executive.

Their message, as Mr Clinton put it in his victory speech on Tuesday night, is that they want both sides to "work together" for the common good and promptly to forget the partisan and bitter nature of much of this long campaign. Even Speaker Newt Gingrich, the most polarising personality in modern politics, was saying yesterday morning: "We don't have to live in a world of

confrontation." That may be desirable but it is not inevitable. Whatever Mr Clinton's second-term agenda, notoriously the most difficult to implement for any incumbent, and regardless of the reshuffled policy team he sends into action, there is one matter of outstanding business that will severely test the limits of bipartisanship. It goes by the generic name of Whitewater, but now embraces

allegations against the White House going far beyond real estate dealings in Arkansas many years ago. Mr Kenneth Starr, the special counsel and a staunch Republican, deliberately released no indictments or exonerations before the election but now is under no such constraint. To all the "-gates" previously bedevilling Mr Clinton's men and women must be added investigations into Democratic party fundraising, mostly from Asian The Republican control of Con-

gressional powers of subpoena could mean a repetition of the past two years, when the likes of Senator Al D'Amato of New York have regularly impugned the integrity of administration officials and their prime suspect, Mrs Hillary Rodham Clinton.

But on election night, Senator Trent Lott, the majority leader, sounded less fierce. Recognising that, in the election, the public had discounted the scandal factor, he did not think hot pursuit of the Clintons should be "a top priority" of the new Congre However, his accommodation fails to take into account the mood of the country's hard right the talk show hosts and newspapers such as the Wall Street Journal (its editorial pages, not its news columns) and the Washington Times. Having failed to persuade the electorate to evict Mr Clinton, their determination

to make his second term a misery - even to bring him down should not be underestimated. They may be assisted, if not with the same political intent, by nedia never entirely comfortable with this president and always mindful of their duty to dig for dirt.

This may cast a large cloud over Mr Clinton's hopes for his second term, although it may also impel him into hyperactivism. But it will be a "busy-ness" of the centre, not, as Republicans charge, of the left. His record of the past two years, plus the nature of a campaign in which he appropriated the middle, should surely have removed the last shreds of suspicion that a flaming liberal wolf will now burst out of a moderate sheep's cloth-

He may not be able to control the economic cycle, but steadyas-we-go policies will continue to be applied, not least by Mr Alan Greenspan, chairman of the Federal Reserve (and a Republican to boot). Gradual deficit reduction will remain a guiding star, as will targeted tax cuts for educational purposes and for homeowners. It would be a big surprise if the Republicans challenged him with the sort of deep across-the-board tax reductions that could not rescue Mr Dole.

By common consent, the president's biggest domestic problems in his second term concern fed-The greatest single favour he could do for vice-president Al Gore, early favourite for the Democratic nomination in 2000, would be to restore financial health to Medicare, covering nearly 40m older Americans and, according to its own trustees, facing insolvency early in the next

A likely approach is through a bipartisan presidential commission. Mr Dole must be a candidate to head it, not least because of his service on the social security reform panel early in the

He may not be able to control the economic cycle, but steady-as-we-go policies will continue to be applied

1980s, and some observers could mean jobs for the odd thought he was inviting such an appointment in his concession speech. The task is technical and daunting, but at least Mr Clinton's election victory served to de-link Medicare from tax cuts. The president's most fruitful area for innovation and experimentation must surely lie in edu-

cation, the emphasis on which was a key to his success. The federal Department of Education is safe, as is Americorps, the youth national service programme, both Republican targets for elimination. The debate over state versus private schooling has been settled in favour of the former. Mr Clinton likes semiindependent "charter" schools discourage vouchers for private lucation

There is a very good chance he will have at least two Supreme Court vacancies to fill, one that of the conservative chief instice William Rehnquist, thereby leaving a judicial imprint long after he has left the White House. After his first re-election in 1936, Franklin Roosevelt tried to pack the highest bench with political cronies. But Mr Clinton's two appointments to date - Justices Ruth Bader Ginsberg and Stephen Breyer - are a better guide to his preferences for legal scholarship and pragmatism over ide-

He will also bring new faces into his administration. According to Mr George Stephanopoulos, the president's right-hand man, Mr Clinton "wants to move in a bipartisan direction". That Republican, such as Senator Dick Lugar of Indiana, or even retired General Colin Powell, possible candidates for the state or defence departments. Two former moderate New England senators Mr Warren Rudman from New Hampshire and Mr William Cohen from Maine - may also be under consideration.

Yesterday Mr Warren Christo pher, the secretary of state, said he would resign early in the new year, and Mr William Perry, the well-regarded defence secretary. may depart a few months later. No clear favourites to succeed Mr Christopher have emerged, though Mrs Madeleine Albright, now ambassador to the UN, and inside the state system but will Mr George Mitchell, former senator and Northern Ireland negotia-

His last national election nov over at the age of only 50, the principal burden for the second term rests on Mr Clinton himself. It would be churlish after this campaign to deny that he is one of the great communicators of contemporary politics, fit to com-pare with Mr Ronald Reagan, yet more versatile and protean. His capacity to recover from personal and political depths might have been noted back in Arkansas and in 1992, but on Tuesday received the ultimate public seal of approval.

He has no rivals now for the bully pulpit, as Theodore Roosevelt once called the White House. How he chooses to use it is strictly up to him, once he finishes unwrapping his

He turned to Ms Kondo, now 73, founder of a classical ballet troupe, to get the project under way. She devised an ingenious

system so that the performers unlike synchronised swimmers could stay underwater for the whole show. They breathe through tubes that look a bit like microphones, and are kept at stage level with the aid of small weights strapped to their waists. Pre-recorded words are

broadcast in the auditorium and

the underwater dancers move

their lips in time. At least a year's training is required to teach them how to avoid taking in water through the nose, and another five years to express emotions convincingly. If it weren't for the paraphernalia, they could try a: world tour, says Kondo's daughter, Yumi, who designs costumes for the group. Surely some entrepreneur somewhere must be willing to take the

Stamped out

plunge and rescue them?

International observers yesterday pronounced free and fair Sunday's elections in Romania that dusted the former communists in favour of the centre right opposition. But not everything was perfect.

Voters turned up to find ballot books with some pages blank and nearly 5 per cent of the votes had to be declared void. This was an improvement, admittedly, on four years ago when more than 10

per cent were annulled. Meanwhile, the chauffeur of the tourism minister was found helpfully stuffing a handful of ballots, favouring his boss's party, into the box, and the local party chief in Bihor county appeared with the voting papers

of four family members and kindly voted on their behalf. Coolest was the response of the head of a polling station in Braila caught sitting by the Danube filling in blank ballots in the ex-communists' favour. He explained that he was annulling unused sheets and that he was about to void them by stamping them again.

Fission fixture

Jean-Claude Leny's 68th birthday on December 4 will probably not be the happiest he has spent. The French government said yesterday that would be the date he would step down as head of Framatome, the French nuclear plant and fuel manufacturer he has run for the nast 16 years.

It has long been known that Leny was off before the end of the year. But there is nonetheless a sense that this well-known critic of plans to merge Framatome with the GEC Alsthom power engineering and transport equipment group is being ushered away into retirement with indecent haste.

Financial Times

100 years ago The American Presidency

Nothing has become Mr. Bryan so well in the whole course of the Presidential contest as the sportsmanlike way in which he has accepted his defeat. "We submitted the question to the American people, and their will is law," he said. We wished that Mr McKinley had been equally restrained in his tone. His success has upset his staid demeanour, and his paean of joy reminds one of a field preacher's peroration rather than of a prologue to a new remarks of the American people: "They have indeed again consecrated themselves and their country and baptised the cherished ordinances of free government with new and holy patriotism." This a rather florid way of saying that they have voted for William McKinley.

50 years ago Wall Street Falls

Although Wall Street was cabled as being greatly pleased with the sweeping victory gained by Republican party in the U.S. mid-term elections, stocks reacted yesterday in one of the sharpest setbacks this year, with losses ranging to \$5. Early gains quickly changed to losses on profit-taking.

Report says slowdown was temporary blip

Asian export growth to accelerate next year

16

The sharp slowdown in Asian export growth in 1996 is a "temporary blip" and the region will return to long-term trend growth rates in 1997. according to a report to be published next week.

The report, by a panel of regional analysts including economists from the Asian Development Bank and US investment banks Morgan Stanley and Salomon Brothers. says the slowdown in Asian exports in the first half of 1996

is reversing. In China, for example, where exports fell 8 per cent in the first six months, there are signs that orders are picking up enough for the country to register 6 per cent export growth for the year as a whole. Average regional export growth is expected to recover 7 per cent in the first half of share of the region's exports,

per cent in 1995.

"The slowdown in Asian exports this year is just a salutary pause for breath which is already showing signs of ending," said Mr Vishvanath Desai, chief economist at the

"Governments are using the opportunity to look at longerterm issues of competitiveness, such as skills shortages and the over-concentration of exports in certain sectors.

The panel estimates 7.3 per cent average gross domestic in 1996 and 1997 - down from the 7.9 per cent in 1995.

The depreciation of the yen, which hit Korean and Taiwan ese exports particularly hard this year, has slowed signifi-

The collapse of global demand for semiconductors, which account for a large

is already beginning to reverse. The panel predicts regional semiconductor and electronics exports will grow more quickly in 1997 as global prices recover.

"Cautionary monetary policies" in China, Thailand and Malaysia, in response to worries about economic overheating in 1995, have stabilised inflation in those countries, says the group. Average inflation for developing Asian countries is expected to fall to 5.5 per cent in 1997 compared with 8 per cent in 1995.

"To a certain extent the slowdown of exports this year was an optical illusion." Mr Desai said.

"This is because export growth was unusually high in 1994 and 1995. The long-term trend is 12-13 per cent growth a year and we are fully optimistic that the region will achieve that rate in

Major to warn against easing terms for Emu

and David Buchan in Paris

Mr John Major, UK prime minister, will tell President Jacques Chirac of France today that European monetary union will not succeed if political pressures to meet the planned 1999 start date lead to any loosening of the strict convergence criteria.

Differences over Emu and the European Union's intergovernmental conference are expected to be central issues at a Franco-British summit in Bordeaux, which opens with a dinner tonight and continues

with formal talks tomorrow. But British and French officials said yesterday the controversial use of a one-off payment of FFr37.5bn (\$7.4bn) from France Télècom to ensure that France's 1997 budget deficit achieves the Maastricht treaty target - a maximum of 3 per cent of gross domestic product - would not be an issue between the two leaders. The issue is closed because

The president's victory in

have approved this payment." the Elysee said yesterday. The French president "can therefore, with his hand on the [EU] treaty, assure Mr Major that France will conform with the criteria for monetary union".

British officials said it was a matter for the European Commission, and only ultimately for member governments, which are likely to take the final decision on Emu qualification early in 1998.

But one official said: "If it goes ahead it's important it's set up on a basis that's sustainable. We're in there negotiating and one way or another a single currency is going to affect the UK.

Mr Major and Mr Chirac will also discuss the Franco-German plan for a proposed flexibility clause in the current intergovernmental conference on the reform of EU institutions. This would allows groups of EU states to integrate more quickly than others in areas of external and internal security and has stirred European Union institutions British fears of exclusion.

But the Elysée claimed it should be in London's interest that such "co-operation should be within the framework of the EU treaty". This would "avoid a certain number of countries trying to advance [their inte-

gration] outside the treaty". Mr Major, who last month consolidated a truce in his own party with his "wait-and-see" approach to Emu, is under strong pressure from Conservatives to talk tough to EU partners over a series of forth-

coming challenge However, the British side stressed that Mr Major and Mr Chirac found common cause on several proposals for EU reform such as the reweighting of votes between member states, the size of the commission and the role of national

To highlight the extent of bilateral co-operation between Britain and France, Mr Major will be accompanied by five senior ministers.

A Franco-British accord on naval co-operation is due to be signed in Bordeaux today.

Comeback kid Financial markets got what they wanted from the US elections - not

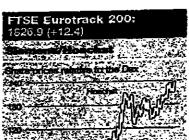

Mr Bill Clinton, not Mr Bob Dole. but the status quo. Wall Street has little affection for or trust in Mr Clinton, but is happy to live with him while he is constrained by a Republican-controlled Congress. Yesterday's stock market rally reflected relief that the feared scenario – both the White House and Congress in Democrat hands - had been avoided. While US politics may present little threat to this euphoria, there are other reasons to query the durability of the rallies in US stocks, bonds and the dollar.

For shares, the risk is stagnation or retreat rather than disaster. Valuations are already stretched - the S&P 500 index is on a historically high price/earnings ratio of 18 while earnings growth is slowing fast, down to only 4 per cent, year-on-year, in the third quarter. For bonds, the danger sign comes from abroad the rise in the OECD leading indicator, which traditionally heralds rising global interest rates.

The main risk to the strong dollar lies in renewed trade friction with Japan. With the election out of the way, one can expect to hear more from disgruntled US car companies and frustrated trade negotiators who have recently maintained a monastic silence. The sharp rise in Japan's trade surplus in the first 20 days of October can only have increased the likelihood of tension. It would be churlish to intrude on the celebrations, but 1997 is unlikely to be as happy a year for Wall Street as 1996.

The European Commission and the European Monetary Institute yesterday performed their traditional good cop, bad cop routine. The Commission's review of economic conditions in the European Union was predictably sympathetic. Twelve of the 15 EU members, it believes, will next year meet the crucial 3 per cent Maastricht deficit criterion. The EMI, by contrast, took a sterner view: a stability pact is no substitute for sound public finances; deficit reduction should be a matter of substance, not the window-dressing of accounts. All of this was as expected, allowing the convergence bandwagon to proceed on its merry way.

There remains, however, a number of risks. One is a split over the post-Emu stability pact. Germany is

THE LEX COLUMN

its EU partners. This may simply be political grandstanding, but Germany's resolve, and the potential for a rift, cannot be dismissed. A row is also brewing between Italy and France over the re-entry level of the lira into the European exchange rate mechanism. On both these issues compromise is possible,

though not automatic. The same cannot be said for the state of the European economy. Low growth in the first half of 1997 presents the single biggest risk to the Maastricht timetable. And the omens from Germany, which ramify across Europe, are not good. Tantalisingly, no amount of political will or accounting fudge can conjure up absent growth. The fat lady may yet sing, but she is not on

Hoechst/Siemens

Most German companies claim to be pursuing shareholder value these days. A look at Hoechst and Siemens shows that can mean very different things. Hoechst's decision to separate its

operating businesses into six independent legal entities is novel for Germany and way ahead of the thinking at rivals such as Bayer. Each division will be run independently and produce financial figures under US accounting standards. That will increase transparency for investors; prevent divisions biding poor performance; and give businesses freedom to pursue acquisitions and joint ventures. But Hoechst is not following its logic through: if it really wants to maximise value, it should demerge these businesses, as Imperial Chempushing for tougher measures than ical Industries did with Zeneca. By

retaining them inside one group though a minority stake in the drugs arm will probably be floated next year - Hoechst is in effect saying it can allocate resources more efficiently than the stock market which is a brave claim.

Like Hoechst, Siemens can bonestly say it has been restructuring But in this case that translates into little more than cost cutting and a push into Asia. The result is yesterday's shock warning of flat profits this year when a double-digit increase had been expected. Mr Heinrich von Pierer, chairman, rejects any suggestion of demergers. But he will have to come up with something more imaginative to win back credibility.

East Midlands/ Dominion

Dominion Resource's non-bid for East Midlands Electricity looks stingy. The US power group has, of course, not decided that it will make a bid. And, as for price, all it has said is that its "present view" is that it will not offer much more than 608p a share. But 608p a share is most unlikely to win. The best way of calculating a fair

take-out price for East Midlands is to compare it with CalEnergy's offer for Northern Electric. Superficially, CalEnergy's 630p bid for Northern is equivalent to an offer of around 608p for East Midlands; both work out at roughly 9 times expected current year earnings. But there is a big difference. Northern is highly geared, with interest cover of a little over 4 times. By contrast, East Midlands' net debt is less than 20 per cent of its market capitalisation and interest cover is nearly 9 times. Taking the different debt levels into account, analysts calculate Dominion would have to offer around 670p-700p a share to give value equivalent to the CalEnergy bid. Add in the fact that East Midlands' management has a better reputation than Northern's and one could push for a little more. But the market should not get carried away. There must be a chance that the UK government would block any bid cause the number of independent regional electricity companies is becoming so depleted that it will prove hard for the regulator to get the necessary information to do his job properly.

- ☐ This was a strong trading performance. Like for like sales growth was 5% with the remainder from acquisitions and new outlets.
- Trading cash flow continued to be good, helping to support a vigorous capital investment programme. Over £250 million has been invested so far this year to secure future growth.
- Our trading results confirm that consumer spending is on an upward trend and I expect this to continue. Competition, particularly in the eating out market, remains strong and at the same time customers' expectations in terms of value for money and quality of service have grown markedly.

Whitbread has worked hard to meet and frequently exceed these expectations. I am confident of the company's ability to compete successfully for an increased share of leisure spending.

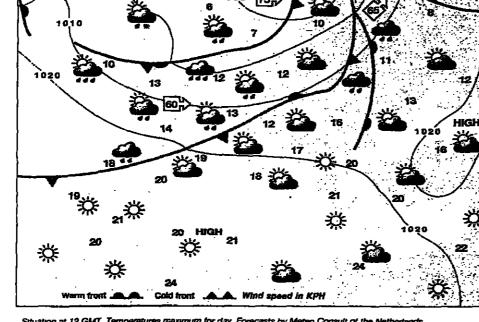

Sir Michael Angus, Chairman

Europe today Most of Europe will be very unsettled. Scandinavia will have

abundant cloud and precipitation. Central Norway and Sweden will have snow or sleet and Finland will have a lot of rain. A westerly flow will be accompanied by numerous showers in countries around the North Sea, it will be sunny over southern Europe and near the Black Sea. There will be a wide range of temperatures across the continent. Central Norway will be below freezing while the Mediterranean will have alternoon temperatures around

Five-day forecast

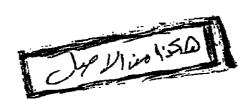

Unsettled conditions will remain as a westerly air flow continues around a depression in the Atlantic, Most of western Europe southern Europe will be generally cloudy.

US Dominion Resources eyes **British utility**

Dominion Resources yesterday became the second US energy group in two weeks to target a regional UK electricity comeany when it announced it was considering a bid of £1.2bn (\$1.9bn) for East Midlands

The Virginia-based utility was forced to announce its takeover intentions after bid speculation pushed East Midlands' share price up 70p yesterday to 607½p on the London Stock Exchange. But Dominion said it would not make an offer above 608p.

Last week, CalEnergy, a US independent power producer, launched a £659m bid for Northern Electric, another regional electricity company. East Midlands was taken

completely unawares by the

until there was "something concrete there's nothing to talk about or comment on". An adviser to the group said the proposed price was "absolutely ridiculous" and not price of 608p would represent a 13 per cent premium to the

start of yesterday. CalEnergy is offering a 21 speculation. An investment expected dividend pay-out. banker suggested that using as 700p a share.

However, morale is thought

company's share price at the

shareholders – mainly because of the impending general election - that they could find a much lower cash offer attractive. The opposition Labour party has said it will impose a windfall tax on utilities if it wins the next election.

Advisers to Dominion, which has a market value of \$6.6bn, said political and regulatory uncertainty made a bid of more than £1.2bn unlikely.

Dominion contemplated making a bid for East Midlands this summer but was unable to gain approval from the US regulators.

Bid speculation died after reports that the Virginia Power Commission had vetoed any takeover move on the grounds that it would affect prices in the home area.

However, it appeared last announcement. It said that night that the commission gave the go-shead for a bid two weeks ago after studying the impact of the proposed deal. Dominion, which has assets

of \$14bn, owns state generator Virginia Power and operates in "even in the right ballpark". A a number of other countries. It was attracted to East Midlands because of the company's costcutting drive since privatisation. COMPANIES AND FINANCE: ASIA-PACIFIC

Citic Pacific considers HK\$5bn stake in Unicom

By John Ridding in Hong Kong

Citic Pacific, the Hong Kong arm of China International Trust & Investment Corp. Beijing's flagship investment vehicle, is considering an investment of up to HK\$5bn (US\$647m) in Unicom. China's second telecoms operator. and is reviewing its stake in

Confirming local press reports. Mr Henry Fan, managing director. said Citic Pacific was still discuss-

Unicom, and that it was not yet clear whether a deal would be

He said an investment would not necessarily have an impact on its 8 per cent shareholding in Hongkong Telecom, the dominant local operator which is a subsidiary of Cable & Wireless of the UK. Citic Pacific's strategy concerning Hongkong Telecom remained undecided.

Citic Pacific's comments follow

its move in June to reduce its stake in Hongkong Telecom from 10 per cent and are likely to add to the uncertainty surrounding the local operator. Speculation about a broader shareholder restructuring, including the sale of a substantial stake to a mainland partner, has been fuelled by Hong Kong's return to Chinese sovereignty in July next year.

In addition to shifting shareholdings, Hongkong Telecom also faces regulatory changes and increased competition, Last year, three new fixed-line operators launched services, while the company's monopoly on international direct-dial services, due to last until 2006, is also under review. Intensifying competition has hit Hongkong Telecom's shares. which have declined more than 3

October against a rising market. Unicom has been authorised to operate telecoms networks in

per cent since the beginning of

munications. At present it is mainly involved in mobile telecoms, because of funding constraints and regulatory obstacles involved in setting up competing local or long-distance networks.

Until now, China has not allowed foreign participation in its telecom operating networks, but is gradually opening the sec-tor. Citic Pacific did not say which divisions of Unicom it might China, breaching the monopoly of invest in, but possible areas

communications and fixed net-

Citic Pacific's parent company, is one of more than a dozen shareholders in Unicom. However, Mr Fan insisted the Hong Kong company was solely responsible for any decision to invest in the telecoms operator. He said that if Citic Pacific went ahead, its low gearing and strong halance sheet would rule out the need to issue shares or spin off assets.

reports profits up

transportation company subject to a A\$2bn (US\$1.6bn) recommended bid from the Dutch KPN post and telecoms group, yesterday announced a 14.7 per cent increase in pre-tax profits from its core operations in the three months to end-September. TNT said it made A\$27m.

before abnormals, up from A\$23.5m a year ago. However, after tax, this figure fell to A\$7.79m, compared with A\$12m previously. On an equity-consolidated basis, pre-tax profits were

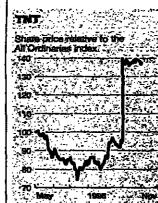

up from A\$14.6m to A\$20.8m, but the after-tax figure was sliced to A\$357,000 from A\$640,000. Sales were A\$1.33bn, against A\$1.8m. In the latest equity-consolidated figures there was no contribution from TNT's 50 per cent stake in Ansett, the Australian airline, which has now

Yesterday, Mr David Mortimer, managing director, said the group expected a better first half than last year."A big factor in the TNT result last year was Ansett . . . so the decoupling of those equity-accounted losses and replacing them with other income has a significant positive effect," he said after TNT's annual

of Conrad

Sino

Hotels

Sino Hotels, which was spun off last year from Sino Land. one of Hong Kong's biggest property developers, is to pay HK\$1.1bn (US\$142m) for a 50 per cent stake in the five-star Conrad Hotel.

The acquisition, which is subject to approval from the other shareholders in Greenroll, the vehicle that owns the Courad, and its bankers, comes as Hong Kong's hotel sector is rallying. Occupancy rates for the year to August for top hotels were 84 per cent and analysts believe the 513-room Conrad could see occupancy rise to 94 per cent next year.

The sellers of the stake are related to Pacific Electric Wire and Cable Company of Taiwan. The headline price works out at HK\$4.3m a room - considered a good deal for Sino Hotels - but any liabilities could alter the equation.

Mr Philip Chan, an analyst with Yamaichi International in Hong Kong, said the fact bankers' consent was required for the deal to proceed suggests the level of lebts could be significant. "If Sino Hotels finances the deal by bank loans, the debt level will increase to nearly HK\$1.3bn in 1997," he said. This would lift the company's gearing from 10 per cent to around 47 per cent,

according to Mr Chan.

Mr Conrad Black, the Canadian media proprietor who owns a 25 per cent interest in Australia's John Fairfax, yesterday made clear he would still like to increase his holding in the newspaper group, but said he would consider selling his stake if the current review of media ownership rules lim-

ited him to this level. "If we become satisfied that there's no chance of going beyond 25 [per cent]. then we would go as soon as we could get what we considered to be a reasonable exit," he said after Fairfax's annual meeting yesterday. Mr Black's interest is capped by foreign ownership rules on media assets. Mr

Samsung Motors may bring car launch forward gradual build-up to mass

By Haig Simonian, Motor Industry

Samsung Motors, the subsidiary of the south Korean industrial and electronics conglomerate, will probably bring forward to January 1998 - two months ahead of schedule – its plan to start selling cars

This follows the completion of building work this week on its integrated car plant in Pusan, three months ahead of schedule. The end of construction coincides with signs that Samsung has accelerated its

carmaking timetable. The company recently opened a Frankfurt office as a listening post for European markets. In September, it opened a US design studio in California, on which it will eventually spend \$20m, to the next four months in the

The only exception is the pharmaceuticals business, HMR, where "an acceptable level of duties" – but no capincurred on the transfer of its US drugs operation into a

new German company. In strategic terms, Hoechst has classified its new companies into four categories. The life science busies, including HMR and AgrEvo, its joint venture crop protection business, will be the growth busi-

Cash will be generated for

The group has defined some of its other companies as stand-alone entities. Celanese, after the takeover receiving "limited group resource allocation and limattention", according to Mr Jurgen Dormann, chairman. This category is likely to "What it began, was our include the group's new polyester business. Hoechst

> The final category is those businesses in need of "long-term renewal".

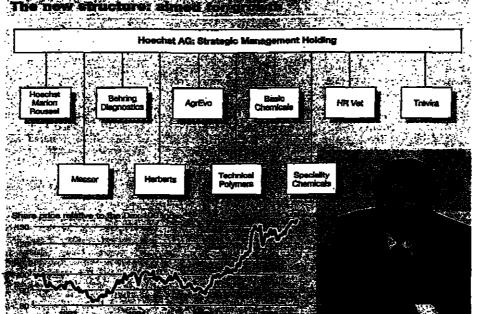

However, the group emphasised that the allocation of financial resources from one of the group's comamount to cross-subsidy. Nor did it indicate a lack of ring-fencing.

Each company would pro-duce full accounts, including a balance sheet and cashflow statement, according to American accounting standards. Their performance would be transparent, as would be any transfer of funds, the group said.

oechst's aim is to get each pusiness valued by investors get each business in its own right. Some of the businesses would be floated as IPOs, the group said. However, it has not yet drawn up a time-table speci-fying which businesses, and

It emphasised it had no plans to issue more than a minority stake in its core life science businesses, but it left open the possibility that some of its other businesses would eventually be 100 per cent public owned.

For HMR, the precise size the group by the next cate- of the proposed share issue

Schmeider, finance director. The group has not yet decided what to do about the outstanding minority stake in Roussel Uclai, the French drugs business that is being subsumed into HMR.

However, Mr Dormann said the group was holding talks with the French government and was "very, very happy" with their Hoechst also announced plans to list on the New

However, this would not involve new capital: the group's aim was to penetrate the market, not to draw on

ity of the financial markets the supply and demand at the time and the share interaction created by the listing will increase the value of Hoechst," Mr Dormann said.

The group also plans to link employees' rewards and incentives directly to the value of the company. German law remains restrictive on stock option incentive schemes but the group was looking at a similar scheme to that adopted by its former subsidiary, SGL Carnbon, floated in New York last

This would involve a fund York Stock Exchange next that invested in share options, which would then be distributed to staff according to performance. "The idea is that the staff will work to create value for

shareholders and the market will pay for it," the group

At the country level, the group operations will become service companies. The free-standing operational companies, such as HMR and Trevira, will be able to buy services from these companies, or out-

wo exceptions will be South Africa and China, where plans for strategic expansion mean the Hoechst businesses will be a single package, answerable directly to the holding company.

The group's plastic business will not be established as a separate company, since it will have moved entirely

into joint ventures by the time of the break-up. Hoechst has a long-stand-ing joint venture in PVC and

recently announced a polypropylene alliance with BASF. Yesterday, it confirmed it was in talks with BP, which were expected to result in a joint venture for its polyethylene business by early next year.

Beyond this alliance, the group gave few hints on further tie-ups. However, it did say that one of the board's main functions under the new structure would be portfolio management. This would lead to constant consideration and re-consideration of acquisitions, disposals, mergers and joint

The group also reaffirmed its aim of becoming the world's largest pharmaceuticals company, although this might not mean a single large acquisition and would certainly involve further biotechnology alliances.

Overall, the new structure neurial freedom and more financial leeway", said Mr Dormann. It would also add value. "The competitiveness of the individual businesses will be proven in the market place and not be obscured by the conglomeration in the group, as has previously

been the case," he said. Mr Schmeider was clear: "We know that the concept of shareholder value is not undisputed in Germany and consider the debate inappropriate. For us, there can't be any doubt that creating and adding value are the ultimate aims of all business

Christiania forge ahead

trend of strong performance by Scandinavian banks was reinforced yesterday by results from Sweden's Swedbank and Christiania Bank in Norway, which showed solid underlying profits growth in the first nine months of the

Swedbank, one of the region's biggest banks by asset value, said operating income jumped 23 per cent in the period from SKr3.1bn to SKr3.8bn (\$573m).

Earnings per share rose from SKr9.71 to SKr10.06. The result was ahead of analysts' expectations and followed similar profit viska Enskilda Banken and Svenska Handelsbanken. Swedbank - known as Sparbanken domestically - saw its shares rise SKr2 to close

at SKr108. In common with SE-Banken, the main factor in Swedbank's earnings rise was a big fall in loan loss provisions, which tumbled 28 per cent from SKrl.8bn to

SKrl.3bn. Swedish banks have now shaken off all but the rem-nants of the credit crisis of the early 1990s which crippled the banking systems in Sweden, Norway and Fin-

land. Instead, they are benefiting this year from much lower interest rates.

But Swedbank was also

business. Net interest income was unchanged, but there was a 35 per cent increase in net commission income from SKr1.4bn to SKrl.9bn and net income from financial operations advanced 18 per cent to

Operating profits before loan losses increased 4 per cent from SKr4.9bn to

SKr5.1bn. At Christiania, Norway's second-largest banking group, operating profits in the first nine months fell back sharply, from NKr2.3bn

to NKrl.56bn (\$241m). But this was due to an expected fall in the exceptionally high levels of writebacks on previous loan loss provisions made during the same period a year ago. Write-backs in the first nine months this year were NKr131m, compared with NKribn last time.

Operating profits before write-backs meanwhile rose from NKr1.26bn to NKr1.4bn due to increases in net interest and commission income phase in Norway's oil-

boosted economy. domestic customers is known as Kreditkassen - is. like its main rival Den norske Bank, in dispute with the tax authorities over the size of the tax losses it can carry forward from Norway's loan loss crisis of the early 1990s.

However, it reported a tax charge of just NKr16m in the helped by significant first nine months, leaving Jenny Luesby improvements in its core net profits at NKr1.55bn.

Coatings help

up net profits by 1.2 per cent divisions was partially offset by declines in PVC and

by 5.15 per cent to F1 5.49bn. per cent to F1510m. It forecast full-year net earnings would be "of the same order of magnitude" as the

FI 1.31bn achieved in 1995. with F11.07bn a year earlier which included a F140m extraordinary gain. On a per share basis, earnings were FF 51.45, against F1 15.10 pre-exceptional last time. The interim dividend is unchanged at F1 1.50.

Mr Syb Bergsma, finance director, said yesterday that about three-fifths of the sales improvement was due to positive foreign exchange movements. Higher volumes were registered in chemicals as well as in coatings, which paint factory. benefited from efficiency improvements to become the leading, earnings contributor

Operating, income from

sales rise registered at MAN

printing and plant construction company, yesterday registered a modest improvement in firstquarter results for its 1996-97 financial year, with new orders rising 2 per cent and sales climbing 5 per cent from a year earlier. Mr Klaus Götte, who

retires as chairman next month, was cautionaly optimistic about full-year earnings, noting that cost-cutting and improving economic conditions should "enable us to continue the upward trend at the MAN group and achieve a good profit again this year". He declined to provide details of first-quarter profits. Like many German com-

panies, MAN is suffering from weak domestic demand, with orders falling 6 per cent in the quarter from July to September. Outside Germany, however, orders climbed 6 per cent. At the same stage last year, overall orders were up

14 per cent, while for the full year orders rose only 1: per cent. However, Mr Götte said foreign demand had begun to recover in the finishing last three months of 1995-96. and that the German investment goods sector was showing signs of a slight

coatings, up 37.7 per cent, in only Fl 2m in third-quarter operating income, down maceuticals side, the biggest upturn. "The trend is positive," Mr Götte said. He added that order inflow had improved at MAN Nutzfahrzeuge, the commercial vehicles unit and MAN's core business, and that its Ferrostaal, MAN Gutehoffnungehütte and SMS units had booked large orders in

the first months of the current year. Group order backlog climbed from DM18.5bn (\$12.2bn) to DM19.2bn in the first quarter. The company also gave details of its results for 1995-96 - headline figures were released in August - during which net profits rose 21 per cent to DM330m. The dividend was raised from DM9.5 to DM12. MAN Nutzfahrzeuge continued to fuel overall earnings growth, lifting pre-tax profits 25 per cent to DM261m. MAN Roland nar rowed its pre-tax loss from

MAN Gutehoffnungshütte, the Ruhr machine and plant construction company, slipped into a DM22m loss from a DM25m pre-tax profit last time because of considerable cost overruns on two Exports represented 41 per cent of revenues for the virtually unchanged at MAN

Dreyfus in rare public outing

ecrecy that has traditionally enveloped the affairs of the family-controlled Louis Dreyfus group, one of the world's largest grain traders, was lifted in Paris yesterday. The dévoilement took place in a discreet first-floor suite at the luxurious Crillon hotel in the heart of Paris. The occasion was a press conference to serve notice of the introduction this month on the Paris Bourse of Louis

Dreyfus Citrus, the group's orange juice company. For the powerful multina-tional - with operations spanning the world and annual turnover of about \$20bn - that the Louis Dreyfus group has become over the 150 years since the present generation's great-greatgrandfather noticed that grain prices were higher in Basle than Mulhouse and decided to arbitrage them,

are not, in truth, all that significant. Sales in the year to June 30 totalled less than FFr2bn (\$390m); net profits weighed in at just FFr189m.

the orange juice operations

But this is enough to make LDC the world's third-largest orange juice manufacturer. Moreover, neither the two blg Brazilian producers - maritime division, as Cutrale and Citrosuco - or meeting drew to a close.

Cargill, the vast US trading house, have stock market A small corner of the veil of quotations. This means LDC will be, as Mr Pierre Deram. finance director, was quick to point out, "the only quoted company of significant size in the orange juice sector". Tropicana, which the group says is the fifth-largest producer, is con-trolled by the diversified Seagram drinks group.

Just over 3m shares, representing a bit less than one third of LDC's capital, will be included in the offer, which is expected to raise between FFr511m and FFr620m

Switzerland's UBS is acting as global co-ordinator of the offer. Shares are expected to start trading later this month on Paris's Second Marche. Mr Deram said the choice of Paris was made "for historical reasons. We

are part of a French group."
Yesterday's event was a
rare treat: it seems unlikely the group - whose far-flung activities also include cotton, coffee, sugar, Brazilian plywood, industrial alcohol and a fleet of 30 ships - will develop a taste for the lime-

We will try to remain as discreet as possible," said Mr Philippe Louis-Dreyfus, managing director of the group's maritime division, as the

ABN Amro set to take Magyar stake

INTERNATIONAL NEWS DIGEST

ABN Amro Bank of the Netherlands looks set to take a majority stake in Magyar Hitel (Credit) Bank, one of Hungary's largest retail banks with assets of about \$1.60m ABN Amro refused to confirm the move, saying only "We have heard no such thing".

The official result is expected tomorrow after a government meeting this afternoon. The only other bidder for the near 90 per cent stake is Austria's Creditanstalt, which like ABN Amro, is aiming to be a strong player in Creditanstalt offered its own branch network as an

in-kind contribution, but the Dutch offer is understood to be providing much needed cash - close to 130 per cent BZW, which acted as adviser for the sale under a Phare

contract, refused to comment "on grounds of confidentiality". "In this tender, everything has gone by the book," said Mr Charles Kovacs, Budapest director.

American Express in Spain deal

American Express has reached a second agreement with a Spanish bank for issuing its charge cards and said it aimed to extend the arrangement to other institutions in Spain. Its deal announced yesterday with the country's leading savings bank, the Barcelona-based La Caixa. follows a joint venture for card services agreed with Banco Santander three years ago.

Mr Jürgen Aumüller, president for Europe of the US travel and financial services group, said the move reflected "a change in strategy" on card distribution which had already led to alliances in Portugal, Ireland. Turkey, Greece and Italy. The group was focusing on selected partners in Europe. There would be "more to come" in Spain, he added.

Efforts to

Bad debts hit S African bank

First National Bank of South Africa yesterday aunounced a sharp drop in second-half profits as bad debts increased by 69 per cent. Net income rose 15.6 per cent to R1bn (\$213m), against R874m last year. But earnings per share were only 8.4 per cents higher at 228 cents after increasing 17.5 per cent in the first half. Operating income

rose 18.1 per cent to R2.5bn. Analysis said the results were well below expectations. The shares fell 15 cents to close at R24.95. Mr Peter Thompson, head of retail banking, blamed poor management of instalment credit and private label cards for the higher had debt charge, which rose from R393.5m in 1995 to R665.2m for the year to September 30. The

dividend was 15.2 per cent higher at 76 cents.

Mr Alan McConnochie, banking analyst at BoE NatWest markets, said the increased dividend "suggests the underlying picture was not so bleak".

Mark Ashurst, Johannesburg

Ukraine awards sale mandates

Ukraine's State Property Fund has awarded four companies the mandate to advise on the privatisation of the Poltava Gas Lamp Factory – marking the launch of the second phase of privatisation in Ukraine. The Poltava factory, which produces street lights and luminescent lamps, is the first of 208 companies the government has committed itself to sell for cash to be put forward.

The advisers are Ernst & Young, the accountancy firm; Epic, a Vienna investment boutique; Kinto Investments & Securities, a Kiev bank, and Squire, Sanders and Dempsey, the US law firm. Philips of the Netherlands and General Electric of the US had expressed interest in Matthew Kaminski, Kiev

Austrian exchanges to merge

The Vienna stock exchange is to merge with the Austrian Futures and Options Exchange (OTOB) and is taking steps to dilute the powerful influence of Austria's big banks on its affairs.

Mr Viktor Klima, Austria's minister of finance, and Mr Gerhard Randa, the president of the stock exchange and reforms designed to boost the attractiveness of the stock exchange and increase its efficiency. The Vienna stock exchange will also turn itself into a shareholder company and bring in outside shareholders not linked to the banks.

Just over 100 domestic companies are listed on the Vienna stock exchange which has a market capitalisation of about \$33bn. However, turnover is running at little more than \$100m a day and there have been no new ssues this year. William Hall. Zurich

Tabaqueira sell-off delayed

Portugal's socialist government has delayed a decision on the privatisation of Tabaqueira, the state-owned tobacco company, and ordered a report on how on the sale would affect competition. Mr Augusto Mateus, the economy minister, has commissioned a study from Portugal's competition council, an independent watchdog, that is expected to lead to conditions designed to safeguard fair competition. Philip Morris of the US, Seita of France, and Tabacalera of Spain are competing for a 65 per cent stake in the group, which accounts for 75 per cent of tobacco sales in Portugal. The government move could delay a final decision on the sale, originally expected last week, by up to six weeks.

AOM board resignations

Representatives of Consortium de Réalisation, the vehicle charged with selling assets of Crédit Lyonnais, the troubled French state-controlled bank, have resigned from the board of AOM, the French domestic airline. The development, emerging just a day after British Airways won its battle to take over Air Liberté, the independent French carrier, will increase attention on the company, which has about 12 per cent of the domestic French market. CDR has been expected to sell the airline before further liberalisation of air travel in the spring and Air France has hinted it might make a bid. David Owen, Paris

Cap Gemini stake sold

Compagnie Générale d'Industrie et de Participations, the French industrial holding company, yesterday announced the sale of 2.4m shares in Cap Gemini, the software group, just a day after becoming the largest shareholder in Valeo, the French car parts manufacturer. The sale of just under 4 per cent of group's share capital was at FFr234 a share, raising FFr561.6m (\$109.6m). David Owen, Paris

 Beiersdorf, the German cosmetics group, said sales climbed 8.2 per cent to DM4.409bn (\$2.9bn) in the nine months to September from DM4.077bn a year earlier.

AFX News, Hamb

■ Securitas, Europe's leading security group, posted pre-tax nine months profits up from SKr334m to SKr389m (\$58.7m), on sales of SKr6.6bn. Net profits rose from SKr228m to SKr274m, and earnings per share from SKr3.34 to Skr3.87.

■ Saint Louis, the French conglomerate, said sales rose 3.8 per cent from FFr25.7bn to FFr26.68bn (\$5.2bn) in the nine months to September.

■ Michelin, the French tyre maker, said sales rose 7.6 per cent from FFr48.6bn to FFr52.3bn (\$10.2bn) in the nine months to September.

THE GERMAN PFANDBRIEF

Progress Report for Investors =

Efforts to enhance transparency and clarify misconceptions paying off

Pfandbriefe continue to attract new investors

Over the course of the last six years the market for German Pfandbriefe bonds secured by pools of bank loans to Germany's public sector and by pools of commercial and residential mortgages - has changed beyond all recognition. Once viewed as an esoteric and illiquid instrument suitable only for domestic consumption, the Pfandbrief is increasingly adapting itself to the demands of the international investment community, while issuance levels have been growing to record volumes.

New issue activity in the Pfandbrief market exploded following German reunification in 1990 and the boom in demand for public-sector, commercial and residential mortgage loans which accompanied it. As a direct result, new issuance tripled between 1990 and 1998, and while 1994 was a subdued year for all bond markets, in 1995 alone a record DM 325 billion of new Pfandbriefe were issued. Today, the German Pfandbrief market is the fifth largest. bond market in the world, with over DM 1.4 trillion outstanding.

Despite growing interest and participation, however, foreign investors still play a minor role in the Pfandbrief market relative to other European fixed-income sectors. While non-German investors are estimated to hold at . least 40% of all outstanding German' government bonds (Bunds), they account for no more than about 15% of the Pfandbrief market.

There are few rational explanations for the still comparatively lower figure by foreign investors in the German Pfandbrief market: after all, the security backing most Pfandbrief issues is on a par with German government risk, with no Pfandbrief

issuer ever having defaulted, while the yieldion the bond offers a generous pick-up over Bunds.

Although substantial progress has been made over the last 24 months in terms of the development and internationalization of the Pfandbrief market, there would still appear to be three main reasons explaining some foreigners' continued reluctance to participate as actively in the Pfandbrief sector as they do in the government bond market. One reason is the perception of many investors that Pfandbriefe are illiquid. Another is the misconception that Pfandbriefe bear the same risk characteristics as US-style mortgagebacked bonds. The third reason has to do with the question of ratings, which for domestic investors in Pfandbriefe are unnecessary in view of the instrument's special legal status in Germany.

Each of these aspects is worth exploring in greater detail. - http://www.

Fact Number One: The liquidity and trans-

parency of German Pfandbriefe have substantially

The perceived problem of illiquidity in the German Pfandbrief market has been conclusively addressed over the last 18 months through the introduction and rapid development of the "Jumbo" Pfandbrief market, which has spearheaded the liquidity and transparency of the Pfandbrief market as a whole, drawing the attention of international investors to the high quality of Germany's largest single segment in the fixed-income sector.

Jumbo Pfandbriefe are classified as issues of DM 1 billion or more with maturities of between two and 10 years in which lead managers pledge to quote tight and consistent spreads on amounts of up to DM 25 million.

Firm evidence that these bonds are now far more liquid than their "traditional" counterparts is that a clear spread exists between the two. Over the course of the third quarter of 1996, for example, traditional Pfandbriefe offered a yield pick-up over the new

The German Bond Market

Mid-year 1996 Market Share of Plandbriefe

DM 3.8 TRILLION...

Jumbo instruments averaging some 8.5 basis points - in effect rewarding investors for the lower liquidity inherent in the traditional Pfandbrief market. Jumbos themselves, however, continued in turn to trade at an average spread of 13.6 basis points over

By the end of September 1996, the total volume of Jumbo Pfandbrief issues had risen to DM 104.6 billion, made up of 67 individual issues. This was an impressive advance by any standards, and means that Jumbo Pfandbriefe accounted for some 30% of the entire Pfandbrief issue volume since

While the development of the Jumbo Pfandbrief has been the single most important recent stimulus to increased liquidity in the market, it has by no means been the only one. Other key advances have included the launch of new Pfandbrief electronic trading systems, IBIS-R and GDO, and the development of the new indices tracking the price and performance of Pfandbriefe, the PEX and PEXP respectively.

Fact Number Two:

German Pfandbriefe are not the German equivalent of US mortgage bonds

A key feature of the history of the German Pfandbrief market is that no issuer of these bonds has ever defaulted. For this, credit goes both (1) to the watertight nature of the collateral against which Pfandbriefe are secured and (2) to the authorities which oversee the market. As an enthusiastic note on the market published in May by Merrill Lynch insists, "the key investor appeal of this market relates to strict German regulations that govern the quality and structure of all assets securing Pfandbriefe. The Federal Banking Supervisory Authority closely monitors all Pfandbrief issues and

issuers, making Plandbriefe one of the safest international fixed-income

"Safest" is the operative word here, because the security backing Pfandbrief issues must be distinguished carefully from the collateral supporting asset-backed (usually mortgage-backed) securities in markets such as the US. The critical difference between the two is that no German Pfandbrief is ever secured against any individual loan per se. Instead, individual Pfandbriefe are all secured against a large, separately registered pool of loans to the public sector (in the case of Public Pfandbriefe) or of first mortgages on residential and commercial property (in the case of Mortgage Pfandbriefe). A further in-built safeguard in the case of Pfandbriefe is that no mortgage eligible as collateral can ever exceed 60% of its pradently assessed lending value - which equates to an over-collateralization ratio of

An additional, and critical, feature of the security of the Pfandbrief market in general, and of the market for Jumbo majority of issues have nothing whatsoever to do with the German mortgage market. This makes the common (but inaccurate) reference to Pfandbriefe as "German mortgage-backed bonds" one of the great misnomers of the international capital market.

In 1995, 78% of new issues in the Pfandbrief market were Public Pfandbriefe. This means that the collateral which backs them is made up of a pool of loans to the German public sector in the form of the federal and state goverament as well as municipal authori-

ties. Given that under German law there is a constitutional obligation for mutual financial support (Finanzausgleich) between the Federal Government and the states, municipal governments and other public-sector entities. this means that Public Pfandbriefe effectively offer investors quasi-govern-

Jumbo Pfandbrief Issuers

As of September 30, 1996

Fact Number Three:

In Germany, ratings are not required in the Pfandbrief

Because of their outstanding quality and safety, Pfandbriefe enjoy a privileged position in Germany's regulatory framework, making ratings unnecessary. Their eligibility as trustee securities (mundelsicher) and as collateral for the Bundesbank's money market repo transactions reflects this special status. Furthermore, as part of the portfolio of German banks and securi-

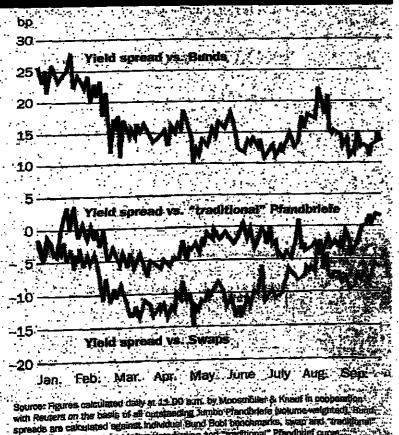

ties companies, Pfandbriefe are privileged in terms of equity requirements. They are preferred as assets for insurance companies' reserves and can be used in the hundled assets of insurance

Given these and other provisions stipulated by German law, Pfandbrief issuers have no need for ratings in Germany. And historically, rating agencies were seldom asked by their inter-

This has changed since the inauguration of the Jumbo market and the internationalization of the Pfandbrief sector which has accompanied it.

Many international investors are prohibited from buying unrated paper, regardless of their perceived asset quality. With an accelerating trend towards the further internationalization of the Pfandbrief, market forces outside of Germany will increasingly demand ratings for issuers wanting to access a broad and diverse international

Average Jumbo Pfandbrief yield spread to Bunds. traditional Pfandbriefe and Swaps

The German Pfandbrief in a nutshell

 $m{T}_{
m he}$ Pfandbrief – for which there is no meaningful English translation - is a German bond issued by a select group of specially authorized banks under a strict legal framework dating back almost 100 years. Germany's Mortgage Bank Act (enacted in 1900) and its Public Sector Pfandbrief Act (of 1927) limits the issuance of Pfandbriefe to 24 pure private mortgage banks, three mixed private mortgage banks, 12 regional Landesbanken and six institutions officially classified as "public sector banks with special tasks". As of the end of June 1996, some 60% of Pfandbriefe outstanding was accounted for by private mortgage banks, with the remaining 40% the domain of pub-

An illuminating measure of the security offered by the Pfandbrief market is that in its entire history, no Pfandbrief issuer has ever defaulted on its obligations. The collateral backing Pfandbriefe takes the form either of real estate mortgages (in the case of Mortgage Pfandbriefe) or loans to oublic-sector entities (Public Pfandbriefe). Importantly, and unlike USstyle collateralized bonds, the security is not allocated to any individual issue. but maintained on an independentlymaintained register which sharply reduces individual issue-specific risk.

As of the end of December 1995, the German Pfandbrief market was the third largest individual bond market outside the US and, with DM 1,258 billion outstanding, was more than twice the size of the UK Government bond ("Gilt") market. The Pfandbrief market accounts for around 35% of the entire German bond market and is comfortably larger than the Federal Government bond ("Bund") market, which contributes just under 28% of all outstanding German fixed-income

SIEMENS: A TROUBLED CONGLOMERATE

Siemens' earnings growth is stuttering, raising questions about the group's strategy and structure. Wolfgang Munchau asks Heinrich von Pierer, chairman, to justify the performance of the German conglomerate, whose shares have, underperformed over the past five years by more than 25 per cent/

Driving up productivity

chairman of Siemens, Germany's second largest industrial group, is frank about the company's share price performance, which has not kept pace with the rest of German industry.

"We are not making enough money. That is clearly the case. And it is also the opinion of the board that we are just not making enough money," he said in an interview. He promised a relenttivity beyond existing measures.

For the past two years, Siemens has been increasing earnings at a rate of over 20 per cent each year, but earnings, as Mr von Pierer admits, will remain flat this year with profits growth slowing over the next few years. This is because of the weak ecohomy and the slowdown in the components business. But he promises to hit the self-imposed target of a 15 per cent return on capital, up from a current 10 per cent, by 2000, with uneven progress on the way. To many observers this may come as a disappointment.

In the short term, Siemens will step up efforts to raise productivity under a three-pronged programme to cut costs, to improve

innovation and to expand in are things we make that perhaps about 10 per cent of the compa-Asia. Last year, the company we should not. But the issue is ny's total incoming orders, a managed a record 8 per cent productivity rise, netting about DMSon (\$5.3bn). This year, the increase will be at least as high, probably higher, says Mr von

There will be a lot more disposals. "Our recent sale of the highperformance printing division was one of the more spectacular sales. But over the last years, we less campaign to drive up produc- separated out dozens of businesses. And you can expect a lot more divestments in the future." However, he defends the structural unity of the company against critics who want it to split into high-technology and

> there is no such thing as a lowtech business. "It is not true that microelectronics, telecommunications and everything connected with electronics is high-tech and the rest is low-tech. Take the new ICE 3 [high-speed train] with its tilting technology, not a hydraulic but electro-mechanical tilting technology. This is high-tech. Gas turbines are high-tech. There you

> find technical developments,

which are absolutely mind-boggl-

ing. Maybe it is true that there

low-technology divisions. He says

mance of some of the company's more traditional electro-technical activities. KWU, the energy subsidiary, just ended an unusually successful year, as did the factory automation business, while semiconductors, the star per-

former last time, suffered a 25 per

not high-tech and low-tech."

He opposes the idea of a sepa-

ration into electronics and elec-

trical divisions, largely because

of the strong earnings perfor-

cent decline in earnings. "I ask myself why nobody puts that question to my friend Jack Welch [chairman of General Electric]. The reason is he achieves excellent earnings. This must be the only reason, because it is much easier to question the presence of synergies at GE than at

He says many of the business units would be worse off if they were not part of the Siemens group. He cites infrastructure projects in central Asia, where Siemens receives bulk orders for the reconstruction work in the telecommunications, energy and transport sectors.

Asia is one of the key planks in Siemens' strategy. It accounts for

share Siemens expects to double by 2000. Without giving up on its German production bases, Siemens is fast building up a network of Asian production sites, which operate at a significantly

lower cost base. Insiders warn that the squee in Germany could get worse. The company is relying for two-thirds of its value-added on Germany, even though two-thirds of sales are abroad. The more expensive Germany becomes, the more the company will need job cuts. Over the past three years, Siemens shed about 44,000 workers in Germany.

Along with many other Ger man engineering companies, Siemens has exhausted much of its ability to achieve productivity increases through classic cost-

Many Siemens factories work employees work more flexible hours than they did before. Some of the better paid staff now receive performance-related pay. But there is still some untapp potential, especially if IG Metall, the engineering union, agrees more flexible work contracts.

Mr von Pierer maintains the main productivity issue in Germany is innovation. He says proudly that the number of in-house inventions almost doubled last year to 5.313. Stemens registered more patents than any other German company, and claims to take number two spot three shifts. The company's in Europe, after Canon, Even small improvements, such as in the efficiency of combined-cycle turbines, would be immediately translated into a large commer-

> In the immediate future, Siemens performance will be

cial and financial advantage, he

affected, probably negatively. by two factors, largely outside its control - the economy and the labour unions. Most of Siemens' businesses lag behind the economic cycle.

The labour dispute in the German engineering industry perhaps marks the greatest financial

As a rule of thumb, each one percentage point rise in engineering sector wages costs Siemens DM200m. Last year's wage settlement and reduced working bours added up to a 7 per cent wage cost increase, or DM1.4bn. Had labour costs remained

static, Siemens would have come close to achieving its 15 per cent target. Siemens and many other German employers fear that the wage dispute could result in another cost increase. Within Siemens, top officials expect that a bad settlement would greatly increase the company's drift abroad.

Mr von Pierer appears determined to close the earnings gap on the best in the sector, notably ABB and General Electric. But given the German eco-

nomic and industrial relations environment, this may take a few

SIEMENS NOXDORF

It may be a sign of the times to see Media-Markt, one of Germany's largest electronics and electrical goods chains, selling Siemens-Nixdorf (SNI) personal computers in the same dispassionate way in which they normally sell toasters or coffee machines.

SNI computers are increasingly becoming mass market products, not the cheapest in their class but cheap enough to qualify. Every eight to 10 weeks, the company churns out two new models, in new colours and shapes, to keep abreast of one of the fastest changing consumer markets

Within SNI, PCs are among the strongest growth divisions. In the last financial year, SNI's PC unit sold about 800,000 computers, with sales of DM3.6bn (\$2.3bn), up from DM2.8bn previously. This is a sizeable chunk of the company's total business volume, of DM13.6bn in 1995/96.

SNI appealing to PC mass market

that sales have been picking up strongly in October, although it is too early to predict whether this was a

freak movement or part of a trend. SNI's PC business operates at a profit after it secured break-even in the 1994/95 financial year. Considering that SNI operates from one of the most expensive countries in the world, the turnround is widely seen inside Germany as a success story, especially given the fragile state of the rest of the computer hardware industry.

The man behind this strategy is Mr Walter Rössler, head of the PC business unit, who has been credited for the turnround of the division, having made changes both to the cost and the

In an interview at the company's headquarters outside Munich, he forecast that SNI would be among those to survive the continuing, if not accelerating, concentration process, as he sees the market shifting from the noname producers back towards the branded goods. "The next wave of customers are not the computer geeks, but ordinary customers who are looking for reliability and who are inclined to buy brand names," he said. With a market share of 14 per cent, SNI is the largest PC manufacturer in Germany, the largest market in Europe. SNI's European market share is between 4 and 5 per cent, which puts it at number three or four in the

RAND MINES

league table, after Compaq and IBM and alongside Hewlett-Packard. SNI further consolidated its grip on the German market when it recently bought a 10 per cent stake in Vobis, the computer maker and retailer, an attempt to achieve production and marketing efficiencies and to secure

component purchases. SNI also increased its stake in Escom, the troubled low-price consumer producer and retailer, from 10 per cent to 12.5 per cent, in another sign of SNPs increasing grip on the German market. But Mr Rössler is notably cautious

an improved negotiating position for

about the significance of the alliance with Vobis. "It is extremely difficult to

justify the alliance exclusively from the point of view of purchasing. That does not work, certainly not against monopolists like Intel or Microsoft. I have always warned against too optimistic expectations.

Key to commercial success in this business is an integrated production

and logistics concep The new range of PCs has a series of value-added functions, which are not common in many low-end products. One feature Mr Rössler is particularly proud of is the energy saving sleepmode, which allows a computer to be kept on alert for 24 hours at low energy consumption, a selling point in environmentally sensitive markets such as Germany or Scandinavia.

SNI's PCs are strictly of the standard Intel/Microsoft variety. SNI also shares with Microsoft the belief in the future of the traditional PC, rather than the low cost network computer, which has been held out as a potential threat to the entire computer hardware industry.

Mr Rössler said: "I don't believe in the network computer. The concept does not fit into the present fee structure of Deutsche Telekom (the German telecommunications operator). The bandwith to receive feature films via the telephone network is too small." But he said he could see a market niche for the network computer as a replacement for the dumb terminal or in corporate networks. Mr Rossler predicts that if everything goes to plan, and without external shocks or price wars beyond the usual, the PC unit could achieve a return on capital employed of 5 per cent.

COMPANIES AND FINANCE: THE AMERICAS

AMERICAS NEWS DIGEST

ADT to sell US vehicle auctioneer

ADT, the electronic security services provider, plans to sell its US vehicle auction business, ADT Automotive the company announced yesterday. ADT's European vehicle auction business was sold a year ago. In July ADT said it was pursuing a \$50n merger with Mr Wayne Huizenga's Republic Industries, but the plan was abandoned two months later after it became clear that the deal could not be completed at the original price because of stock market

But ADT said that the sale of the vehicle auction business was already on the agenda before the merger was conceived, as part of ADT's strategy of becoming a pure security services company. "Following the proposed divestment of ADT Automotive, ADT will only have activities in the electronic security services sector and our strategy of refocusing resources on the growth and development of the electronic security services business will be complete," said Mr Michael Ashcroft, chairman and chief executive officer of ADT, which is based in

After its recent acquisition of ASH, ADT is now the biggest provider of electronic security services in the UK and Southern California. Sources close to the company said it has been approached by several potential buyers of ADT Automotive, and that the sale was likely to be completed in the first half of 1997. ADT Automotive made operating income of \$41m in the 12 months ending September 1996, on net sales of \$287m.

Repsol plans Peru investment

Repsol, the Spanish energy group, has announced plans to invest a total of \$240m in its Peruvian activities over the next five years. Repsol said it would invest more than \$200m in expanding its liquid gas and marketing operations, and a further amount corresponding to its share of the \$116m investment earmarked for the Pampilla refinery, in which it has an indirect stake.

The group also aims to expand its network of gasoline stations in Peru, beyond the 30 stations it currently operates there, to secure a 15 per cent market share over AFX News, Madrid

Banco Santander IPO popular

Banco Santander, the Spanish banking group, said the initial public offering on the Santiago stock exchange of shares in its Santander Chile Holding unit had been oversubscribed. The amount raised from the offer is \$137m. The share offering closed on October 31, with subscriptions totalling \$165m, above the initial expectations of \$100m-\$120m. Retail investors accounted

for 74 per cent of total demand. The offering is part of a \$290m capital increase for Santander Chile Holding, which is responsible for all the group's activities in Chile, and represents 27.7 per cent of the Santander Chile capital. The balance of the capital increase would be subscribed by Banco Santander itself, AFX News, Madrid

CSX bid fuels Conrail battle

By John Authers

619

4.7

The second

The acrimonious struggle for the control of Conrail, the US railroad company, intennificantly raised of its bid for a share. However the converthe company.

Norfolk Southern, a rival railroad which has made a competing bid, confirmed that it had ended its talks with CSX over a possible amicable resolution to the issue, involving a split of Conrail's routes and assets.

This followed heavy dealing in all three companies on Monday, which had been fuelled by speculation that Conrail would be split.

A successful takeover by either CSX or Norfolk Southern would create the largest US railroad company. Analysts yesterday suggested that CSX's revised bid had brought an end to the process a little closer, although both legal and regulatory barriers made it

hard to compare the offers. Norfolk Southern's hostile bid of \$100 per share, all in cash, values Conrail at about is complicated, involving month, it had been trading both cash and stock. As in at \$69%.

the original merger negotiated by the boards of CSX and Conrail last month, 40 per cent would be in cash

and 60 per cent in stock. The cash element has been sed from \$92.50 to \$110 sion ratio for the remaining 60 per cent of the stock remains at 1.86 CSX shares on offer for each Conrail share. This is equivalent at yesterday's values to \$80 per

Mr Anthony Hatch, transport analyst at NatWest Securities, said that pricing the offer was difficult because a gap of a year could almost be guaranteed between CSX taking control of Conrail and finally completing the share swap.

CSX claimed it could raise its hid because had formd an extra \$180m in synergies and cost savings. It added there were clear public policy advantages to the merger.

Both CSX - down \$1 to \$43 - and Norfolk Southern down \$1 to \$88% - lost ground in early trading yesterday. Conrail's shares rallied \$1% to \$93%. Before the \$9.1bn. The response by CSX first bid was announced last

YPF at top of expectations New capacity

By David Pilling In Buenos Aires

YPF, Latin America's biggest private oil group, yesterday announced thirdquarter profits at the top end of expectations, helped by higher oil and gas prices and a turnround at Maxus, the loss-making group bought last year.

YPF also announced that Maxus is to form a joint-venture with Amoco of the US. aimed at cutting costs of oil and gas operations in the Texas Panhandle and west-ern Oklahoma. The accord with Amoco, which still requires the formal approval of both boards, has been long awaited by Argentine energy analysts, who believe YPF needs a US partner to

increase efficiency. "They've now got rid of of \$4.3m after dividend paymost of the Maxus probments, against a loss of \$9m

lems," said Mr Christopher in the June quarter. Ecclestone of brokers Inter-acciones. "YPF's overall results look really good, with pre-tax income dramatically above last year."

Net profits of \$231m were at the high end of market expectations according to Mr Daniel Tassan-Din, head of research at Deutsche Morgan Grenfell in Buenos Aires, against \$264m. The comparable period included an exceptional gain of \$65m, and YPF also started paying corporate tax this year, representing an additional cost over 1995 of \$85m.

A 54 per cent increase in operating income was largely due to higher oil This quarter, Maxus

moved into the black for the first time, showing a profit

At the time of last year's takeover, Maxus was "a company with very long legs but with a very small head," said Mr Roberto Monti Maxus chief executive-officer. The US group had excellent engineers but bad management, which had used US gas

Mr Monti, who is due to take over from Mr Nells León as CEO of YPF next March, said the new management team had cut costs while raising production and

rily resolved a dispute with the new Ecuadorian government, and would convert its service contract for block 16 to a production sharing ent, he said. Mr Tassan-Din said YPF

Henkel offers \$1.2bn for Loctite

New York

chemicals company, launched a formal \$1.2bn tender offer on Tuesday for the 65 per cent it does not. own of Loctite, sparking a rare hostile bid in the US by a German company.

The move came the day after Henkel executives presented the case for a takeover to a special committee set up by the US adhesives and sealants group to consider the question.

since Mr Dieter Winkhaus, Henkel chief executive, first Henkel, the German proposed a \$56-a-share acquisition to his opposite number, Mr David Freeman, Loctite has failed to indicate any willingness to negotiate, according to a person familiar with the discussions.

Henkel, which is being advised in the US by Rothschild Inc, marks an intensification of its efforts to put pressure on the Loctite board to agree to an acquisition. It first announced its share, values the US com-

interest in buying the company late last month. By putting a 60-day deadline on its tender offer on Tuesday, however, rather than the more usual 30 days, the German company appeared to leave some room for negotiation between the two sides rather than force The latest move by ing an all-out battle. With 35 per cent of the company already, Henkel is thought

take its holding above 50 per

to be in a strong position to

ted earnings this year, according to a regulatory fil-ing made yesterday. Loctite's shares edged \$%

higher in New York yester-day morning, to \$58%, on hopes that Henkel would eventually be forced to lift its offer again to secure the Loctite's board's approval. "It remains our preference

to enter into a friendly, negotiated transaction with the management and board of Loctite," Mr Winkhaus said in a statement on Tues-

lifts Telebrás at nine months

By Geoff Dyer in São Paulo

New telephone lines and increased traffic helped Telebrás, Brazil's state-controlled telecommunications company, to more than double third-quarter consolidated net profits, it said yesterday.

The company said profits rose from R\$265m to R\$640m (U\$\$623m)in the period from July to September. As a result, profits in the first nine months of the year had risen from R\$573m to R\$1.98bn.

Turnover grew 61 per cent. from R\$7.5bn to R\$12bn, in the first three quarters, while earnings per 1,000 shares advanced from R\$2.7 to R\$7.45.

Analysts said the figures were slightly above expectations but cautioned that a breakdown of the results. the group's balance sheet or detailed figures for the bolding company were not yet available.

Telebrás said the improvement came from new tele-phone capacity, increased volume of calls, higher tariffs and lower financial charges.

The results were issued in accordance with recent changes in Brazilian corporate law, which prohibits companies adjusting figures in line with inflation, and are therefore not directly comparable. The law is part investment in the past.

of the government's anti-inflationary strategy of removing automatic "indexation"

from the economy.

The news lifted the preference shares 1 per cent to R\$81.2. This followed a 2 per cent rally in Telebras preference shares on Tuesday after the Brazilian government confirmed its plans for privatising cellular services. probably in May 1997.

The government is to sell "B-band" concessions which will compete against the 'A-band" services operated by Telebrás's state subsidiaries. As expected, the concessions will last for 15 years. However, the tender process is simpler than originally proposed, which could drive up the prices of conces-

Mr Jacobo Valentino, ana lyst at Deutsche Morgan Grenfell in Sao Paulo, said the government's decision not to charge the state com-panies for the "A-band" concessions was "good news" for Telebrás shares. The announcement had also lifted any uncertainty about the government's willingness to go ahead with privatising cellular services, he

Analysts believe there is big potential for growth in both conventional and cellular services in Brazil because of strong demand and under-

NEW SHAREHOLDERS:

PURSUIT OF INNOVATION AND GLOBALIZATION STRATEGY

■ New shareholders ---

Valeo's Board meeting on November 4; 1996 was informed of the disposal of the stake held by Cerus in Valeo to:

 The Compagnie Générale d'Industrie et de Participations (CGIP), which becomes Valeo's prime shareholder with a 20.2% stake and 19.5% of voting rights. CGIP was previously a shareholder in Valeo from 1986 (with an 8% stake) to 1993. Its Chairman, Ernest-Antoine S been a member of Valeo's Board since 1986.

- The Caisse des Dépôts et Consignations, which already holds a 1.9% interest in Valeo and is increasing its stake by 3.5% to 5.4%.

- IP Morgan GT Corporation which becomes a new shareholder with a 3.6% stake.

M New Board Members

Three new members representing CGIP, Guy de Wouters, Jean-Marc Janodet and Arnaud Fayet have been co-opted by the Board and will be proposed to shareholders at the next General Assembly called to approve the Group's 1996 accounts. They will be replacing Rodolfo De Benedetti, Giovanni Germano and Michel Cicurel (the permanent representative of Cerus), who are resigning their seats.

Interim Dividend

The Board has decided to pay an extraordinary interim dividend of 10 French francs per share, which will benefit from a 5 franc tax credit. It took into consideration Valeo's financial situation, the regular increase in results as well as the expectations of all Valeo's shareholders.

The Crédit du Nord will make the interim dividend payment as from November 18, 1996.

1986 - 1996 - 11 years of growth

After Cerus took a stake in Valeo in 1986, the Group focused entirely on the automotive components industry for passenger cars and trucks: -Valeo has intensified its industrial investments on all the world's key

markets and increased the resources dedicated to research and

The Group has become a systems supplier and has developed its electronics expertise allowing it to offer complete modules and systems in line with the evolution of the automotive industry.

- At the same time, Valeo has deployed an acquisitions policy to strengthen its core businesses and diversify. - It has developed its traditional businesses, Clutches, Friction Materials,

Climate Control, Engine Cooling, Lighting Systems, Electrical Systems, Wiper Systems and Distribution to achieve critical mass. It has also set up new operations dedicated to Security Systems and Electronics.

Valeo has thus strengthened its identity as an independent automotive supplier at the service of all car and truck manufacturers and has become one of the world's major companies in the industry.

To serve its global strategy, Valeo has developed its own management systems and a 5 Core Strategy process which provide the Group with common working methods and tools.

Today Valeo has 95 production and R & D facilities in 20 countries and

employs 31,000 people. Expanding through internal as well as external growth operations, Valeo has increased its sales from FF 12 billion in 1986 to close to FF 29 billion in 1996. At the same time the percentage of Valeo's sales achieved outside France has risen from 46% in 1986 to 68% in 1996. Its profitability has

Payment of an interim dividend

enabled the Group to finance development and provide a return on capital.

During the same period, Valeo's share price has risen from 71 French francs at the beginning of 1986, to 310 French francs on November 4, 1996 (taking into account the 5-to-1 stock split in May 1994).

Since 1986 fixed assets have increased by a factor of 3.4, while stockholders' equity has risen by a factor of 5 and the Group has eliminated indebtedness through improved results and reduced working capital requirements.

Balance sheet structure at 12.31,1986 and at 06.30.1996

(In FF Inimons)

1996: a year of transition

The agreement between Cerus and Valeo's new shareholders has ended the period of transition which began at the end of 1995.

For Noël Goutard, Chairman & CEO of Valeo, "this outcome preserves the Group's identity and integrity. It meets with general approval and in particular has the backing of Valeo's key European, notably French, and American

"Valeo's new shareholder structure will mean the continuation of our strategy focused on offering our customers ever more innovative and competitive products and systems on a global basis," adds Noël Goutard. The Chairman stresses that, "this solution was made possible by the continued confidence expressed by customers in Valeo throughout 1996, by the support of shareholders and by the professionalism, composure and focus of Valeo's management and employees".

In 1996, after 9 months activity, the Group announced sales up by 16.7% against the same period in 1995. Sales are set to near the FF 29 billion mark for the year 1996.

Long term Strategy

The new shareholder structure allows Valeo to pursue its long term

In the coming years, Valeo will adapt itself to seize the opportunities offered by the world automotive industry:

-The Group will be involved in the design of the car for the 21st century which will have to comply with constraints related to costs, safety, urban mobility, multi-media communications, the environment and vehicle recyclability. These changes will contribute to the renewal of the vehicle parc, more specifically in the major markets of Western Europe, North America and Japan. As a part of this, Valeo will be enlarging its offering by enhancing technological innovation in line with the expectations of both vehicle manufacturers and motorists. It will back up its industrial

expansion by developing new service activities. - In the emerging countries of Asia, South America and Eastern Europe, the Group will be participating in the strong growth of the car and utility vehicle industry.

As it has done in the past, the Group will continue to focus on its strategy to satisfy the expectations of its partners, namely its customers, employees and suppliers, with the aim of constantly enhancing shareholder value.

LEX COMMENT **Tomkins**

It is surprising that a company that has been so successful at making its operating assets sweat has failed to apply the same practice to its balance sheet. Tomkins is Britain's . 120 only remaining large unreconstructed conglomerate, still singing the virtues of diversity and deals. Its management style has much to commend it, producing buns as efficiently as guns. But there are good reasons why its shares are at the same level as when it acquired

Ranks Hovis McDougall in October 1992. It has achieved poor returns on capital from ieals, particularly RHM; and it has an excessively conse vative balance sheet. So even though the recent \$1.16bn Gates buy looks sound, the shares continue to drift down. There are obvious remedies. Tomkins should have almost £800m of net cash by 1998, having cleaned up Gates. If it pumped that £800m into a programme of share buy-backs, it would enhance earnings in 1998 by more than 10 per cent. Moreover, its cost of capital would fall, making it easier to achieve value enhancing deals. Alternatively, it could demerge RHM, which would command a premium to Tomkins' lowly market rating. And growth in the remaining group would accelerate. Smith & Wesson also looks a good candidate for a value enhancing spin-off.
Sadly, Tomkins' conviction that conglomerates work
and that cash is a core strategic asset inspires limited hope of change. Perhaps the company needs the unwanted attentions of a swashbuckling conglomerate.

TI urged to lift Forsheda bid

Henderson Investors, the fund manager, yesterday urged TI Group to lift its £189m (\$308m) bid for Forsheda, the Swedish polymer

engineering company. The fund manager, which controls 12.8 per cent of Forsheda's listed B shares, last night wrote to TI's brokers warning them that they would vote against the deal unless it was increased.

tors in the B shares should receive an extra 10 per cent payment from TI. TI last night confirmed it

had received the Henderson

letter but that it was not

The bank's route into telecoms banking was circu-Investment banking was not in Mr Alt's blood. His itous. Rothschild, well connected with Conservative father, a Hungarian Jew, politicians, won work as advisers to the government was a diamond trader and on 1980s privatisations such as British Gas and British his son, born in 1946, followed him into business. In

Rothschild.

1991. SG Warburg, acting as government adviser on the second tranche of BT's privatisation, resigned as adviser to the company, NM Rothschild stepped in.

From then on the assignments came swiftly. Rothssmall to win the prized and hicrative positions of global co-ordinator, but under Mr Alt it developed a niche business advising governments and companies on privatisation and how to deal with other investment banks.

Rothschild was, other investment bankers joke, the eunuch in the harem: ruining their business by negotiating down the fees on international equity offerings below the 3 per cent of deal size seen as standard.

That reputation has helped Rothschild win telecoms privatisation assignments in countries as diverse as Cuba, Moldova, Greece, Hungary and the Ivory Coast, as well as in the UK and Germany.

Along the way Mr Alt, although he has never actually seen a telecoms a something of a specialist.
"We got some deals and 1973, as a budding corporate Petroleum. The break-learned on the way," he said.

through in telecoms came in "I'm not a technological expert but I've had to learn the economics and the regulation.

Mr Alt conceded that some of Rothschild's telecom business came by fluke. But the rewards in investment banking often go to the opportunists. And Mr Alt - while his famous temper sometimes handicaps him as a manager and negotiator - has a talent for making the most of his chances. "I do go for it," he

Rothschild's telecoms practice is not home and dry. Rivals say the bank is over-stretched when working simultaneously on complicated deals.
While the company has cli-

ents among privatised or privatising giants such as Deut-sche Telekom and BT, it has fewer relationships among the fast-growing interlopers into the sector. And Roths child, through its recent joint venture with ABN Amro, is now trying to sell international equity offerings, as well as advising cli-ents on them, Rothschild is trying to have it both ways. But Mr Alt, a fit squash and cricket player who smokes two packets of Silk Cut a day, is a master at reconciling contradictions.

US buoyancy gives Europe early support

By Richard Lapper and Ramrai Gogna in London and Usa Bransten

Italy and Spain were again the centre of attention in European markets, initially moving sharply higher following's Tuesday's strong performance, before losing ground later in the day.

Buoyancy in the US market, following Tuesday's presidential election, provided early support and there were reports of heavy European bonds, with hedge funds again said to be particularly active.

On Liffe, the December BTP contract rose to a high of 126.43, before settling at 125.70, up 0.10. in the cash market the Italian 10-year

yield spread over Germany fell to a low of 190 basis points - bringing Italian yields flat to gilts - before dropping back to 194 basis points, still down 4 points on

the day. Spanish bonds were stronger, with the December bono settling more than a quarter percentage point higher at 109.02 and the 10-year yield spread over Germany falling by 6 basts points to 162 points.

With early strength in the US contributing to a euphoric mood, the markets mist at Nikko Securities. brushed off the European US institutional buying of Monetary Institute's report, which said EU states were dragging their heels on fiscal deficit reduction.

"Many traders never got beyond the headlines," said Mr Mark Fox, chief European strategist at Lehman Brothers. Dealers said the lied by 14 to 1094 on the

release of Italian October back of overnight gains by inflation data - confirming US Treasuries, but then the annual rate has fallen to 3 per cent - provided justification for some buying.

Later in the day, rumours of a possible delay to Emu helped engender a more cautious mood. "Spreads are incredibly stretched," said Mr Fox. "Any story would be enough to move them out".

"People felt that the market was going to go up and they just needed an excuse to buy," said Mr Julian Jessop, chief European econo-

months ago which was the spread I would be watching. I wouldn't have guessed it would be Italy against the UK and Spain against the UK, but that is the way peo-ple are playing it," he added. In the UK the long gilt ral-

prices fell sharply lower from midday, with fears raised by the release of the Bank of England inflation report. The long gilt dipped

to 108g before settling at

109%, up & on the day, In the cash market, the benchmark 10-year gilt rose to end the day at 99%, its yield falling 1 basis point to 7.61 per cent. It underperformed the equivalent German bund, with the yield spread widening by two basis points to 184 points. "If you had asked me six But analysts in London remained bullish over the

medium term. German and French bonds both rose, again helped by strength in the US. On Liffe the December bund contract settled at 100.33, up 0.21, while the December notional gained 0.42 to settle at 127.38.

bonds via Goldman Sachs.

Investors largely liked what they saw in the results of the US elections, helping Treasuries to hold on to the sharp recent gains.

Bonds surged on Asian buying as the polls gave the markets exactly what they expected, continued Republican control of both houses of Congress and a second term from the Democratic president, Mr Bill Clinton.

However, profit-taking took hold of the market as trading began in New York, sending Treasuries back to where they had been late on Tuesday.

By early afternoon, the benchmark 30-year Treasury was up & to 102%, yielding 6.580 per cent - its lowest level since March - while the two-year note slipped ± to 100%, yielding 5.722 per cent. The December 30-year bond future rose 🔥 to 1134.

Analysts said that, given that there should be little change in general direction of monetary or fiscal polices. following the election, the market's focus would likely return to economic funda-

mentals Also on the agenda yesterday was the second leg of the Treasury Department's refunding quarterly operations.

Traders were optimistic that decent demand would be shown at the afternoon auction of \$10bn in 10-year notes, despite the somewhat lacklustre appetite shown at Tuesday's auction of threeyear notes.

Existing 10-year notes were 3 higher at 101% to yield 6.252 per cent. The Treasury concludes its refunding operations today with the sale of \$10bn in 30-

Banks improve their disclosure of derivatives

By Samer Iskandar

Disclosure by banks and securities houses of their derivative positions improved significantly last year, according to a regula-tors report published today.

The report - by the Basle Committee on Banking Supervision and the Technical Committee of the International Organisation of Securities Commissions says disclosure of both qualitative and quantitative information has improved.

Of a total of 79 institutions participating in the survey. 71 discussed the objectives and strategies of their trading activities, compared with 38 when the survey was first conducted in 1993. Sixty-six institutions had disclosed the same information in relation to their non-trading activities, up from 37 two

years earlier. The number of institutions giving more information about how they monitor their credit and market risks has almost doubled over the

same period. However, these institutions remain in a minority. The report pointed out that "more than half of the institutions included in the survey still do not discuss how these risks arise and how

they are managed". The survey also showed that institutions differ in the level of detail they are willing to make public. But despite these shortcomings. the report comes to the conclusion that "there have been notable enhancements in the qualitative discus-

There has also been an improvement in the disclosure of quantitative information. "A noteworthy develop-

sions".

ued expansion in the number of institutions disclosing quantitative information on their exposure to market risk", the report says. "In 1995, 36 banks provided value-at-risk based disclosures. as compared with 18 in 1994 and 4 in 1993."

However, the institutions covered by the survey continue to differentiate between trading activities and non-trading activities.

The report points out that "the number of banks that furnished quantitative information on their non-trading activities remained low", while "there was some increase in the number of institutions providing quantitative disclosures of trading account market values".

The treatment of credit risk also remains patchy in some cases. While 41 institutions provided information on counterparty credit quality, up from 27 in 1994 and only 6 in 1993, few institutions chose to provide information on collateral and other credit enhancements.

But overall, the report shows that the representative sample of financial institutions appears to follow the public disclosure recommendations issued in November 1995 by the Basie Committee and losco's Technical Com-mittee. These recommendations were based on the authors' belief that "meaningful public disclosures play an important role in reinforcing the efforts of supervisors to foster financial market stability".

Dollar fails to gain on US election results

MARKETS REPORT By Simon Kuper

The US election results failed to buoy the dollar, even though most market analysis had predicted that the American currency would benefit from President Clinton's re-election and the Republicans' continued grip on Congress

The dollar did rise in overpfennig against the D-Mark, but it lost the advances to close in London unchanged against the German currency and Y0.2 weaker against the yen. Currency strategists blamed profit taking and fears that with the election over, Washington might relax its support for a strong dollar. Sterling's weakness against the D-Mark also held the US cur-

rency back. Sterling was the big mover on the foreign exchanges. A Bank of England inflation report that appeared in the

morning wiped out about 25 prennigs of gains the pound had made in Asian trading against the D-Mark.

The report called sterling's strength a temporary phenomenon that did not justify a looser interest rate policy. and said that the UK was in danger of missing its target of keeping inflation below 2.5 per cent in two years'

The pound closed seven night Asian trading, gaining tenths of a plennig down against the D-Mark at DM2.489 in London yesterday. It fell two fifths of a cent against the dollar to \$1,642

The D-Mark hardly moved against most other European currencies despite a European Monetary Institute report which said that many countries, including Ger-

many, France and Italy, had much to do to meet the criteria for joining the single European currency. Most countries do not now meet the criteria, the report said. The market discounted a European Commission report that was more bullish about the prospects for monetary union, because it expects the Commission to

be bullish on EMU. As expected, the Reserve Bank of Australia cut its overnight cash rate by 50 hasis points to 6.50 per cent. The Australian dollar firmed on the news, closing in London four fifths of a cent higher against the US dollar at A\$1.2618.

■. If: the dollar made no gains after the US election, it was mainly because the currency markets had already discounted the results. Mr Bob Lynch, senior currency analyst at MMS International in New York, said yesterday: "There were few surprises last night."

The markets' dream scenario has come true: a second Clinton term and a Republican Congress that will keep cutting the budget deficit. But currency strategists now worry that the White House will end its support for the strong dollar even if Mr Robert Rubin, the treasury secretary who has been the policy's main proponent, stays in office

into Mr Clinton's next term.

The US trade deficit is ■ There is a new twist to cial problems now annear less acute than they did last year, when the strong-dollar policy was put in place. Mr Nick Parsons, currency analyst at Paribas Capital Markets in Paris, said yesterday that the strong currency suited President Clinton before the election because it buoyed US asset markets and suggested an international vote of confidence in his economic policies. "Now the Administration has less of a need for a strong dollar," Mr Parsons said. Strategists said Washington was more likely to shift slowly to a new dollar policy than to try to weaken the currency

growing and Japan's finan- the spat between France and Italy over the correct central rate for the lira in the European exchange rate mechanism, which Italy is expected to join later this month. France has long been pressing for a rate of about L950 to the D-Mark while Italy seeks a weaker lira at more than L1,000, arguing that this is about the present

Paris is now thought to be angry about the Italian central bank's reported selling of lira in recent days. Many French officials are thought to believe that the interventions have created an artificial rate.

The lira's central rate in the ERM must be agreed unanimously by the European Union's monetary com-

Burma returns to the rice export market

By Ted Bardacke in Rangoon

After cancelling contracts to export 500,000 tonnes of rice earlier this year, Burma has re-entered the world rice export market, shipping rice export policy are taken 20,000 tonnes in August at such a high level in the under new contracts and expecting to ship 150,000 tonnes in the first quarter of next year, traders said.

Burma, which maintains a government monopoly on rice exports, is unlikely to get a good price for its new shipments as traders have lost some confidence in the country's ability to honour contracts after the debacle of 18 months of unfulfilled con-

tracts, the traders said. the first since the governon new rice exports in February, 1995, during a dra- of between 5 and 14 baskets

matic and politically danger ous rise in domestic prices. The traders added that although the stocks to export the 150,000 tonnes would likely be available by January, decisions about

country could lose out in the low quality rice market to Vietnam, which allows some private traders to move rice into the world market. Rice exports are the Burmese government's main earnings, accounting for half

source of foreign exchange of government exports of \$400m in 1994-95. While the domestic rice market has been liberalised, most of the The August contracts are rice for export is procured at between one-fifth and onement imposed a moratorium half of the domestic market price through a "paddy tax"

Planting in the Mandalay region of Burma, once considered the rice bowl of Asia

(one basket equals 20.87kg) per acre. The World Bank says these price distortions lower Burma's rice yield per acre by 10 per cent.

With the country following tary regime has been banka strict policy of limiting hardwood exports and said to be facing an acute foreign exchange shortage, the mili-

ing on increased rice exports to pay for key government sector imports such as fuel exports materialise, it would bring the total amount of rice shipped in fiscal 1996-97 to about 300,000 tonnes. This is slightly less than fiscal 1995-96 exports of 350,000 tonnes and a big drop from the more than 1m tormes of exports in 1994-95, which was the largest amount exported since socialism was introduced in 1962 and a four-fold increase from the 261,000 tonnes shipped in 1993-94.

If the 150,000 tonnes of rice

The control of the co

After the success of the 1994-95 season, agriculture officials had hoped to export 1.5m tonnes in 1995-96 and the country's five-year development plan called for 3m tonnes of exports by 2000–01, equalling the country's his-toric high reached in colonial Burma of the 1920s when it was considered the

ference. He said demand for

most minerals and metals

few would exceed that level.

In the medium term, the

annual increase in demand

for copper would be equiva-

lent to 300,000 tonnes, that

for zinc 200,000 topnes, for

aluminium 600,000 tonnes

and for iron ore the equiva-

some cases less than the pro-

spective output of a single

typical project," he told the

conference, organised by broker J.B. Were. "At the

very best the erosion of

existing capacity will double

"These tonnages are in

lent of 8m to 10m tonnes.

would grow at a rate well

investigations, it could lead to more delays." De Beers' contract with Russia ran out in December,

but a memorandum of understanding about a new three-year deal was signed in February. Mr Capon said a final draft had been making the rounds of the relevant ministries and was nearing final governmental approval.

Indian crude oil output to fall India's crude oil production is expected to drop by 2m

tonnes to 33.72m for the 1996-97 year, the Indian government said yesterday. "The decline in output is due to erratic behaviour of certain oil fields in the country." Mr T. R. Baalu, the Indian petroleum minister, told a conference in New Delhi. A very high gas to oil ratio was also contributing to the shortfall, he said.

The government had previously projected domestic

crude output rising to 36m tonnes this year from 35.19m tonnes in 1995-95. The drop will mean increased oil imports for India, which imports more than half the oil and petroleum products it consumes annually. Mr Baalu said imports of crude oil and petroleum products leapt by 15 per cent to 47.7m tonnes in the year to March. Domestic demand is increasing by 7 per cent a year.

Mr Baalu estimated demand for petroleum products would climb to Sim tonnes in 1996–97 from 74.7m in 1995 -96, and called for increased refining capacity through Lisa Vaughan, New Delhi private investment.

BHP project approved BHP, the Australian resources group, confirmed that it

had received final government approvals for the Northwest Territories diamonds project, which will be the first diamond mine in the Lac de Gras region. It said the project now had "full government support", subject only to finalising the necessary water licence and land lease. BHP owns a 51 per cent of the project, with Canada's Dia Met being the other large shareholder. The aim is to bring the mine into production in the second half of 1998. • An Feng Steel, the Taiwanese steel group, and Perth-based Kingstream Resources, have been given "broad support" by the Western Australian government for their proposed iron and steel project at Geraldton. Among the details of the state agreement is a provision for a pipeline licence, which might enable the partners to source gas from the Carnarvon Basin, if a contract cannot be negotiated with the state-owned gas company. They said the only concern raised by the government was the location of the steel mill. Nikki Tait, Sydney

Grain futures consolidate

By Deborah Hargreaves and Robert Corzine

Chicago grain futures started to consolidate vesterday following Tuesday's fall, which knocked 2 per cent off the March futures price for wheat at the Chicago Board of Trade.

Traders covering their short positions pushed wheat futures up three cents and March maize futures up two cents a bushel by midsession. Soyabean futures shot up six cents a bushel to \$6.78 following a rise of two cents on Tuesday.

Soyabeans have been buoyed by a squeeze on supplies, with large grain buyers stopping delivery of 1.7m bushels of beans against the CBOT's November futures contract yesterday to get their hands on the crop.

The market has also been boosted by estimates released by US analysts which put the 1996 US soyabean harvest at 2.3bn bushels ~ below the 2.4bn bushels expected by the market.

The freight market continued its recent climb, with the Baltic Freight Index up 35 points to 1.393. Freight rates are dominated by strength in shipments of grain from the US Gulf to Japan, and Australian coal being delivered to Japan.

South Korea and China. Oil prices firmed after inventory data from the US showed a surprise fall in distillate stocks. Benchmark Brent Blend for December delivery was quoted at \$22.50 a barrel in late London trading, up 31 cents on Tuesday's close.

Fear of a shortage of distillates has been a big factor in recent crude price rises.

Near-term rise forecast in metals

By Kenneth Gooding, Wining Correspondent

Aluminium, nickel and zinc prices are set to rise by 5 to 10 per cent in the near term, according to Noranda, the diversified Canadian natural resources group.

Meanwhile, RTZ-CRA, the

world's biggest mining company, has warned metals and minerals producers that they are in danger of overes-timating growth in demand for their products. Mr David Burnstead, Nor-

anda's executive vice-president, told a meeting with investors and analysts in London that the three metals were currently trading at prices well below the average for the past 10 years. He said copper's price was also well below the average but the outlook was not so favourable because a surge of new supply was on the way. Lead was trading well above its 10-year average price, which suggested little

room for improvement.

Metal prices index = 10-yr everaga, \$ terms 1995 Sept 18

prices reflected a lack of economic growth in Europe and substantial de-stocking worldwide. If consumers reversed the trend and restocked, price increases Mr Doug Brown, Noranda

could be "quite dramatic". director of commodity and trade research, is forecasting substantial western world surpluses of copper: 65,000 tonnes this year, 320,000 tonnes next year, 525,000 at RTZ-CRA, came at the tonnes in 1998 and 815,000 Australian Resources Contonnes in 1999. He expects average London Metal Exchange copper prices to range from \$1,873 to below that of global eco-nomic activity. Only a very

\$2.093 a tonne next year,

from \$1,763 to \$1,984 in 1998 and between \$1,653 and \$1.873 in 1999. In contrast, he predicts the western world aluminium market will be more or less balanced and sees prices ranging from \$1,587 to \$2,862 a tonne next year, between \$1,653 and \$1,873 in 1998 and from \$1.763 to \$1.984 in 1999.

\$1,102 to \$1,212 a tonne next year, between \$1,212 and \$1.322 in 1998 and between \$1,322 and \$1,543 in 1999. Mr Brown sees the nickel price remaining relatively flat in the three years, ranging from \$8,265 to \$9,367 a tonne in 1997, then from \$8,265 to \$11,020 and in 1999

Zinc prices are also predicted to rise, ranging from

from \$8,265 to \$9,918. lip Crowson, chief economist

 Noranda said operations at its Heath Steele zinc and lead mine in New Brunswick

these prospective needs."

LONDON STOCK EXCHANGE

Takeover talk and Wall St boosts UK stocks

By Stave Thompson, UK Stock Market Editor

A powerful opening performance by Wall Street in response to Bill Clinton's re-election as US president rescued the London market from a turbulent trading session.

Earlier, a 25-point gain in the FTSE 100 was almost wiped out following publication of the Bank of England's quarterly inflation report, which called for further increases in domestic interest rates, triggering a flurry of selling across the equity market.

But the London market's confi-

it opened

When the dust had settled in the market place, the FTSE was left with a 14.6 gain at 3,935.7 after a swing of almost 35 points. But the midsession damage

was generally confined to the FTSE 100 leaders. The second-liners, represented by the FTSE 250 index, were never under any exceptional selling pressure, with that index ending the day a net 8.7 up at 4,413.9. Even at its worst yesterday the index was 4 points higher. The FTSE SmallCap index settled 1.7 firmer at 2,162.6.

The market, and specifically dence returned as the Dow Jones the FTSE 250, was also given a

Industrial Average powered to a big boost by a fresh burst of take- that the Republicans had calls for further increases in UK 50-points plus gain shortly after over speculation in the regional retained control of the US Con- interest rates. electricity stocks, which are heavily represented in the 250 index.

Talk in the market sugge that a share bid for East Midlands Electricity is imminent. Some traders were speculating on another US-sourced bid. An hour after the market closed, Dominion Resources of the US

said it was considering a bid for

the UK group. Shares kicked off the day in confident form, responding to Wall Street's near 40-point rise and the 1-point gain in the US long bond in the wake of the US

they could give no reason for subsidiary.

was a sense of relief that the

gress was positive for the market in that they could block any perceived reckless spending plans by President Clinton

But the Bank of England's inflation report put paid to the market's initial flush of enthusiasm, stating that without further increases in rates the Government's 2.5 per cent target for inflation by spring 1997 would be unattainable. Marketmakers said that, plus worries that this morning's Confederation of British Industry October survey of Distributive Trades could bring more news of growing inflation-

through healthcare reforms.

E Mids up ahead of bid news

By Peter John

East Midlands Electricity shot higher in afternoon trading as takeover talk returned and was later confirmed. Shares in one of the last five independent regional electricity companies jumped 70 to 6071/2p. still well below their peak of 785p

Possible buyers included Houston Industries and Florida Light & Power of the US as well as Severn Trent of the UK. But no names were being mentioned yesterday and Severn Trent shares assisted by a buy recommendation from HSBC James Capel - actually rose 8

to 632½p. East Midlands, which is currently in closed season, said that not only did it never comment on market rumour, but it had received exchange to comment on the unusual share price move.

An hour after the market closed, Dominion Resources of the US announced it was considering an offer. The company said it was evaluating a potential offer, but was not prepared make an offer "at a price that is much in excess of East Midlands Electricity's closing price".

There are some concerns that the regulator might not uninspiring. permit any more mergers or

takeovers in the sector, although among the other remaining independents Southern lifted 211/4 to 669p and Yorkshire 15½ to 754p.

Cookson, the conglomerate, was the second-heaviest traded stock in the market, with one institution said to have sold a block of 9m shares at 210p. These were subsequently placed at 212p. Analysts have been busy downgrading their Cookson profits forecasts in recent days. The shares ended the

session a net 2 off at 2151/20. HSBC Holdings hit a new high following a strong showing by shares in Hong Kong, where half its stock is owned. The stock ended up 29 at 13121/p.

In Hong Kong, the Hang Seng index rose 2.2 per cent to close at a record 12,775.47. The strength offset a big put warrant sale by Merrill Lynch. The broker launched 60m American-style put war-

rants on HSBC shares. Abbey National rose 131/2 to 650½p after two brokers recommended the stock.

Lloyd Thompson, the insurance broker, lifted 6 to 174p on news that it is to repurchase up to 7.8m of its own shares - about 10 per cent of its stock. The shares may be purchased at a maximum price equal to 105 per cent of the average middle market quotations for the 10 business days before the shares are contracted to be bought

491p following results earlier this week which had initially been greeted as good but Kiugfisher fell 101/2 to

Marks & Spencer rose 8 to

European roofing businesses the Congress means it will with those of Braas GmbH, be more difficult for the FT 30 INDEX Nov 6 Nov 5 Nov 4 Nov 1 Oct 31 Yr ago "High "Low

we'd like you to join our newly formed FT Reader Panel.

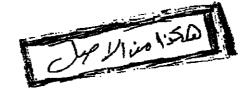

The Panel will be made up of a representative group of Financial Times readers from all European countries. Membership will last up to two years during which time we will ask members to complete three to four questionnaires per year.

Each questionnaire will take no more than 10-15 minutes of your time and the information we receive will help determine our future marketing and editorial plans. As a 'thank you' to our Panel monitors, respondents in each survey will be entered into a prize draw.

Completed questionnaires will be processed by an independent computer bureau, Media Plus Research, and all data received will be treated in the strictest confidence with results being used in statistical form only. So, to have a say, just say that you would like to join the FT Reader Panel by completing the coupon below. As a token of our appreciation, all returned coupons will be entered into a draw to win one of 5 Financial Times Leatherbound Desk Diaries (worth approximately \$50.00).

1. How often do you read the Financial Times? (by regularly, we mean on average at feast 3 out of 4 sissues)					2 For how many the financial Tim	3 is the copy of the FT that you reed? Your own - purchased by self/delivered to h	ome 🗅

US shares head for fresh peaks

US investors, relieved that the status quo in Washington would continue in the wake of Tuesday's elections.

At 1 pm, the Dow Jones Industrial Average was 65.23 stronger at 6,146.41, putting it on course to pass its closing record of 6,094.32 set on October 18. The Stan-dard & Poor's 500, which 6.51 at 720.65, and the American Stock Exchange composite climbed 3.38 at 577.00. NYSE volume was 286m

of the investment policy Dow post a modestly better committee at Goldman Sachs put it succinctly: "People are feeling jolly".

A continuation of Presiwith a healthy picture for to \$96%. corporate profits - should be bullish for equities in the long term, she said. Howthe market's strong perfor- \$1 at \$43 and Norfolk

Technology shares soured at the defeat of a California ballot initiative that threatsent equities to new highs in ened to increase litigation early trading. writes for some of the sector's most Lisa Bransten in New York. volatile issues. The Nasdaq composite, weighted toward that sector, added 11.38 at 1,240.45 and the Pacific Stock Exchange technology index climbed 1.5 per cent.

intel, which is the largest company on the Nasdaq and peaked on Tuesday, was also had said that it would stop sharply higher with a gain of giving guidance about future earnings if the ballot measure had passed, added \$2% at \$116%. Microsoft rose \$1%

Multinationals were the Ms Abby Cohen, co-chair strongest issues, helping the performance than the S&P. The Morgan Stanley index of multinationals' shares added 1.4 per cent. Rising Dow condent Bill Clinton's fiscal stitutents included IBM, up restraint and aggressive \$3 to \$132%, Merck, \$2% to trade policy - combined \$78% and Philip Morris, \$2% \$78% and Philip Morris, \$2%

Elsewhere, Conrail rose \$1% to \$94 as CSX increased its friendly bid for the rival ever, she added that, given railroad company. CSX fell

mance since July, there Southern, which has could be some consolidation launched a hostile bid for Conrail, shed \$1% at \$87%.

TORONTO mirrored the the early upturn on Wall Street. At noon, the 300 composite index was 67.19 ahead at 5.731.66. Banks and conglomerates

led the way up with both sectors notching gains of more than 2 per cent. Golds were held in check by the flat bullion price. Royal Bank of Canada put on C\$1.35 to C\$48.40 and

Bank of Montreal added 55 cents to C\$45.00. Imasco, the financial services, tobacco and retailing combine, jumped C\$2.50 to C\$84.00. MEXICO CITY reversed an early slide to trade slightly

higher at midsession, with foreign investors said to be more active than in recent sessions. The IPC index was 1.45 higher at 3,287.40. CARACAS recovered some poise. Dealers said that investors continued to concentrate on the flotation of CANTV, the state telecoms

group which opened for sub-scription on Tuesday and

sparked a heavy sell-off. At

midsession, the IBC index

was 33.99 firmer at 5,820.2.

Siemens off 9% as bourses climb

EUROPE Bourses celebrated political equilibrium in the US, but there were shocks closer to home as the heavily weighted Siemens dropped 9 per cent. It was a measure of ' in Frankfurt, noted that the the strength elsewhere in FRANKFURT that the Dax

index closed 19.12 higher at

an Ibis-indicated 2,735.28.

Siemens, previously, had expected some years of double-digit growth. It delivered on-target earnings and a dividend rise for the year to September, but blamed weakness in semiconductors and restructuring costs in medical technology for the news that it was ex-growth in the current year.

The shares careered lower. losing DM7.17 in the end at DM72.80, after talk of a number of broker downgrades and share price targets in the DM65 to DM70 range.

Turnover climbed again. from DM8.5bn to DM11.9bn. There was a suggestion that the Siemens selling, which drove volume in the shares up from 2.5m on the session to around 9m after hours, created a gap which was plugged with buying of other German blue chins.

Hoechst, for example, rose DM2.53, or 4.3 per cent, to DM60.87 on third-quarter results which could have been better, according to Ms Barbara Altmann at B scrap older vehicles.

Metzler in Frankfurt. Another big mover was SAP prefs, up DM10.70, or 5.4 per cent, to DM208.20 for a gain of 10 per cent this week. However, Mr Hans-Peter Wodnick, at Credit Lyonnais software group was still paying the price for disappointing the market some two weeks ago. Just before that, the shares had peaked at

DM282.50. MILAN climbed 2 per cent as the recovery in Fist and its group companies continned and on comments by the Italian treasury minister, who said that EU forecasts on the Italian economy confirmed that the country would be in shape to join a single currency at the outset. The Comit index rose

12.41 to 626.71. Fiat jumped L213 to L4,460. taking its two-day rise to 12.3 per cent. One analyst suggested that the stock was benefiting from the success ful flotation of New Holland, its farm and construction equipment subsidiary, which raised \$1bn for Fiat last

He noted switching from defensive utilities, specula-tion about a restructuring in the car group's chemicals operations and hopes that the government might respond favourably to Fiat's overtures for incentives to

262.21, or 1.2 per cent, to

21,526.28. Professionals noted that
